OUR FARMERS HAVE A MONEY MAKING CHANCE

"The year 1923 presents a wonderful chance for money-making to level headed common sense farmers all over the South," said H. G. Hastings, prominent agricultural leader, recently.

"By this we do not mean an expanded cotton acreage over that of 1922, but just the contrary. There were enough acres planted in cotton last year to furnish, under normal season of growth, all the American cotton that that world can afford to pay a price for that will reward the cotton grower adequately for his work."

"Every effort will be made by cotton speculators and the European cotton mills to encourage larger acreage. The present price of cotton distinctly encourages our folks to go 'cotton crazy' again just as they always have in high price periods in past years. Every year there has been increased cotton acreage in high price periods there has followed a mountain of debt and farmer bankruptcies the following fall and winter."

"Increased acreage in cotton in 1923 should be fought like fire. Stick to that acreage which has been found safe under weevil conditions. Cultivate and fertilize to increase yield per acre as much as you please, but don't increase acreage. If you do you simply play into the hands of the speculators again. Plant every available acre outside the limited cotton acreage in food, grain and forage crops. No farmer can afford to buy food and grain from merchants when that food and grain can be produced on home acres at certainly not more than half the store price. "Further, every dollar's worth produced on home acres in the way of needed food and grain for home consumption means a dollar less spent or gone into debt for. If we all 'lived at home and boarded at the same place' most of our cotton money would stick in our pockets or to our account in the bank instead of all going to pay debts. The money that sticks is the money that counts."
