

## HELP FOR GIRLS WHO WORK

Mrs. Lodic Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Tyrone, Pa.—"A friend told my husband how Lydia E. Pinkham's Vegetable Compound had helped his wife, so my husband bought me a bottle because I was so run-down, had a nervous weakness, no strength in my body and pains in my left side so bad that I could hardly do my work. Before I was married I used to work in the factory, and I had pains just the same then as I have had since I have done my housework. I would not be without a bottle in the house now. It has stopped the pains all right and I have found out that it is a wonderful body builder, as it has made me well and strong. It is going to be the 'old reliable' with me hereafter, and I am always willing to tell other women how it has helped me. You can use this letter as you wish as I can honestly say that my words are true."—Mrs. M. LODIC, R.F.D. No. 4, Box 40, Tyrone, Pa.

Letters like this bring out the merit of Lydia E. Pinkham's Vegetable Compound. They tell of the relief from such pains and ailments after taking Lydia E. Pinkham's Vegetable Compound.

## Don't Let That Cold Turn Into "Flu"

Rub on Good Old Musterole  
That cold may turn into "Flu," Grippe or, even worse, Pneumonia, unless you take care of it at once. Rub good old Musterole on the congested parts and see how quickly it brings relief.

Colds are merely congestion. Musterole, made from pure oil of mustard, camphor, menthol and other simple ingredients, is a counter-irritant which stimulates circulation and helps break up the cold.

As effective as the messy old mustard plaster, it does the work without the blister.

Just rub it on with your finger-tips. You will feel a warm tingle as it enters the pores, then a cooling sensation that brings welcome relief.

## Mother Tells How to Make A Baby Bright

"If your baby is bad and cross it's a sure sign he needs Teethina," says Mrs. Clair McConnell, of Norman Park, Ga. "That's the way it always was with my little boy. When he was fretting and cross I would give him Teethina and then he was bright and laughing again."

"Teethina is wonderful for them when they get older, too. I give it to my seven-year-old boy and you never saw anything do so much good." The most frequent cause of fretting, cross babies is painful disorders in their little tender bowels. Give them Teethina. Your mother used it. It's perfectly harmless.

Sold by all druggists, or send 30c to Moffett Laboratories, Columbus, Ga., and get a package of Teethina and a wonderful booklet about Baby.—Advertisement.

## HOW

OLD FORM OF WINDMILL HAS BEEN IMPROVED ON.—Up to within the last few years, the windmill has remained practically much the same and unimproved since prehistoric times. Recently it has been taken on a new and remarkable development, assuming the character of a "wind turbine" for producing electricity.

In one form, as thus modified, it is a cylindrical arrangement of steel slats placed vertically and at an angle so as to catch the wind. This forms the outer part, which is fixed and immovable. The wind, entering through the slats, causes the inner part to revolve, the latter having a central axis set at top and bottom upon ball-bearings.

Thus delicately poised, the inner part revolves in response to the slightest breeze, and, as it turns, it drives machinery by which the energy developed is converted into electricity. A windmill of this kind, with three or more superposed "stories" and one central shaft, is capable of delivering 300 horsepower.

The old-fashioned type of windmill utilizes only about 17 per cent of the power of the air currents caught by its vanes. It is thoroughly unscientific. In Denmark today properly constructed wind motors produce more than 70 horsepower with a good wind.

The Danish wind motors, however, are built on a principle wholly different from that above described. They have vanes resembling in form airplane propellers, somewhat modified, these being usually of sheet iron and five in number.

A windmill of this type automatically turns its vanes edgewise to the wind when the latter blows too hard, thus insuring the safety of the apparatus. In the other type the same object is gained through the fact that not more than a certain amount of air per second can enter between the vertical slats, and thus a limit is set to the speed at which the inner part of the contrivance can revolve.

## MOTION PICTURES IN COLORS

How Process, Developed by an American, Has Been Brought to High Point of Success.

A great defect of moving pictures has been the lack of color. The staring black and white of the ordinary photographic film is tiresome to the taste and fatiguing to the eye.

Various experiments have been made in coloring moving picture films, but none had been very satisfactory until the problem was taken up by Dr. Daniel F. Comstock of the department of physics and optics in the Massachusetts Institute of Technology.

In association with Dr. Herbert Kalmus, an electrochemist of distinction, Doctor Comstock has perfected a process based upon the chromatic optics of color photography, by which the colors of nature are reproduced in the film and may be thrown on the screen by any projecting lantern. The inventors call this process "technicolor," and a technicolor film play is now running at the Rialto theater, in New York, and attracting the attention of artists as well as of the general public.—From the Outlook.

## How Radio Goes to Prison.

To be apprehended by means of radio and then to be entertained by it in jail is the ironical outlook for lawbreakers in Washington, D. C. The inmates there may stretch out on their prison cots and listen to the stirring strains of the United States Navy band, the daily police reports on stolen automobiles, and perhaps they may even speculate on the ease with which the radio waves penetrate the stone walls of their prison. A loop aerial is used to catch the waves for the receiving set. After using ear phones to tune in, the operator switches the programs onto a loud speaker placed in the rotunda of the jail; by this means the inmates in the distant cells hear the entertainment plainly. Often, however, Capt. W. L. Peak allows the 320 men to leave their cells and come down to the auditorium.—Popular Radio.

## How Lamp Carbons Are Obtained.

Carbons of high grade are, it is said, obtained from tar by a Swedish process. The powdered carbon is pressed to form electric light carbons, or larger sizes for electro-chemical work. The method is based on the fact that finely divided carbon makes up a large percentage of the composition of tar and is what gives the black color, this being due to the carbon particles suspended in an otherwise dense, and transparent yellowish brown liquid.

## How Trees Grow.

The rings of a tree grow from the inside out; that is, the inside rings are the oldest and the outside rings the newest. This can be easily proven by the greater percentage of sap or life-giving fluid found in the outer ring and promoting its growth.

## How Airplane Has Improved.

In the first days of the Wright airplane, 19 years ago, the speed of their machines was about 30 miles an hour. Recently the airplane has touched the mark of 212 miles an hour.

## TEACHER PAYS IT GLOWING TRIBUTE

Declares Tanlac Ended Indigestion, Chest Pains and Palpitation—Lost Strength Restored.

"Tanlac has improved my general condition ten times more than I anticipated," recently stated Herbert A. Gup-till, a well-known school teacher of Kezar Falls, Maine.

"My trouble began with a sudden loss of strength. Almost everything I ate disagreed with me and caused a sickening sensation that remained with me for hours. For months I found breathing difficult on account of indigestion, and had such chest pains and palpitation I thought my heart was affected. I also suffered greatly from headaches and nervousness, seldom slept well, and felt tired and worn-out all the time.

"Since taking Tanlac no kind of food hurts me and I have a wonderful appetite. I have gained ten pounds, breathe freely, sleep perfectly, and feel as strong and well as ever in my life. Tanlac is certainly a superior medicine."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

# IF BILIOUS, SICK! TAKE NO CALOMEL

"Dodson's Liver Tone" Straightens You Up Better Than Salivating, Dangerous Calomel and Doesn't Upset You—Don't Lose a Day's Work—Read Guarantee

You're bilious! Your liver is sluggish! You feel lazy, dizzy and all knocked out. Your head is dull, your tongue is coated; breath bad; stomach sour and bowels constipated. But don't take salivating calomel. It makes you sick, you may lose a day's work.

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel crashes into sour bile like dynamite, breaking it up. That's when you feel that awful nausea and cramping.

If you want to enjoy the nicest, gentlest liver and bowel cleansing you ever experienced just take a spoonful of harmless Dodson's Liver Tone to-

night. Your druggist or dealer sells you a bottle of Dodson's Liver Tone for a few cents under my personal money-back guarantee that each spoonful will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick.

Dodson's Liver Tone is real liver medicine. You'll know it next morning because you will wake up feeling fine, your liver will be working, your headache and dizziness gone, your stomach will be sweet and your bowels regular. You will feel like working; you'll be cheerful and full of vigor.

Dodson's Liver Tone is entirely vegetable, therefore harmless and can not salivate. Give it to your children.
