## Let's Talk About the Power of Money

For it has power more than any other single thing—except the human mind. Why?

Because money is a token that represents work or food or machinery—things that are useful and have power to create and satisfy.

That's why your money here in a savings account earns for you. The things back of the money are working and the profits are credited to your account in terms of dollars. Wouldn't you be foolish not to take advantage of this power of your dollars?
