CHATHAM TO THE FRONT NOW.

Much Excitement in Cumnock Over Finding Hard Coal.

Chatham is surely coming into its own. The latest discovery in the coal fields in the region of Gulf is the finding of hard coal. Of course everyone in that section is excited over this find.

A test hole had been driven on the Phillips place near Gulf and at a good depth, five feet of coal of excellent quality and hardness was struck.

A large crowd from the entire field soon gathered but the engineer in charge allowed only officials of the surrounding mines to enter the opening. Each visitor was allowed to take away a piece of hard coal as a souvenir.

In the bank of Gulf is exhibited a very large lump given the cashier by C. H. Gunter, engineer in charge of the work. In an interview Mr. Gunter stated that the present work would stop, as such had been made merely as a test.

Officials of the Cumnock and Carolina mines were loud in their congratulations and pronounced the seam of coal superior to anything yet found in the vicinity.

Lee and Chatham counties are now among the "reds."
