Headache, Lumbago, Rheumatism, Pain, Pain

How To Quickly Stop Bad Coughs

It is often surprising how quickly the heaviest cough disappears when treated by a remarkable new method.

Here is the method, based on the famous Dr. King's New Discovery for Coughs: You simply take one teaspoonful and hold it in your throat for 15 or 20 seconds before swallowing it. The prescription has a double action. It not only soothes and heals irritation, but also loosens and removes the phlegm and congestion which are the real cause of the coughing. So the severest cough soon disappears completely.

Dr. King's New Discovery is for coughs, chest colds, bronchitis, spasmodic croup, etc. Fine for children, too—no harmful drugs. Very economical, as the dose is only one teaspoonful. At all good druggists. Ask for

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters,

hangings—every-thing! Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or

HAVE YOUR EYES EXAMINED BY AN EXPERT—COSTS NO MORE

Dr. J. C. Mann, the well known eyesight Specialist and Optician will be at Dr. Farrell's office in Pittsboro, N. C., every fourth Tuesday and at Dr. Thomas' office, Siler in each month. Headache relieved City, N. C., every fourth Thursday, when caused by eye strain. When he fits you with glasses you have the satisfaction of knowing that they are correct. Make a note of the date and see him if your eyes are weak. His next visit to Pittsboro will be on Tuesday, May 25. His next visit to Siler City will be on Thursday, May 27.

AMOUNT OF RUBBER IN MAN MEASURED

Scientist Tests Elasticity of Cells.

Philadelphia. — Stretching human and plant cells to determine their elasticity is no longer a stretch of imagination.

It is under the microscope, working with glass needles with microscopically fine points, that Dr. William Seifritz, professor of botany at the University of Pennsylvania, is appraising how much "rubber" there is in man's make-up, just as the engineers have tested the coefficient of the elasticity of steel and other structural materials.

So far, among other results, Doctor Seifritz has determined that the blood cell, or corpuscle, of the frog can be stretched to ten times its size. The human blood cell, however, is more stubborn. It stretches to only three times its original size before it breaks.

The extremely delicate nature of the experiment is apparent when he tells that the human blood corpuscle has a diameter of one two-hundred-thousandth of an inch. The stretching, too, is accomplished by hand-made glass needles manufactured by himself.

Glass threads are held over a small flame and suddenly snapped. These are then inserted in two holders on each side of the microscope. Then, as he peers through the lens of the instrument, they are gradually screwed toward the lone cell held in a minute drop of water hanging from a cover of glass under the instrument.

The needle points catch. They are screwed up to pierce the membrane. Then, with almost painful slowness, the distance between the needle points is widened, the distance being measured on a fine scale.

"We don't know yet just what the full value of this study will be," said Doctor Seifritz. "Science knows now that many diseases are due to leaky membranes losing salts necessary for proper functioning."

"A membrane of high elasticity is fairly watertight; conversely, a membrane of low elasticity is leaky. Leaky membranes in humans mean all sorts of trouble. They are porous and lose their necessary constituents."

"The human protoplasmic cells are not as elastic as rubber. They are like bread dough in more ways than one. They have the same sticky consistency and many of the same characteristics. Muscle and nerve fibers are being subjected to the same scrutiny by scientists. Nerve fibers have been found to be highly elastic—considerably more so than muscle fibers."

"It may be that a great deal may be learned of cancer caused through such experiments. There are scientists who are working on the cells with this end in view."

Says First League of Nations Was 546 B. C.

London. — Those concerned over placing the honor of having first conceived the idea of the League of Nations have been astonished by the suggestion of Prof. H. A. Giles of Cambridge, noted student of the culture and history of China, that China made an attempt to create such a league 546 years before Christ.

What is now China was then divided into a number of separate independent states, several of which were larger than France or Germany of today. A covenant was signed by representatives of various states with a view to putting an end to war but two states held out and the league failed. Three hundred years later the states were brought together by warlike methods under the Ch'in dynasty.

Bear Cubs in Virginia Sold at \$1 Per Pound

Luray, Va.—Bears have become so numerous in parts of Highland county—50 miles southwest of Luray—that cubs are being sold for \$1 per pound at Monterey, the county seat. Hunters a few days ago found a number of cubs at a point near where Augusta, Highland and Pendleton counties adjoin. The mother bear was routed, leaving her offspring.

After being captured the bears were placed "on bottles," drinking the milk with relish. They have become so docile that little girls fondle them in their laps. After being supplied with milk the cubs invariably drop into deep slumber. A few minutes that are allowed to extend over the stated hours for their meals bring sharp and ominous growls from the cubs.

Bering Sea Hero Has Merit for Auto Driver

New York.—Magistrate Giorgio in Ridgewood court fined Frank Roberts, a sailor, \$50 for having driven a car without a license. As Roberts had only \$25, he was about to go to jail, when he mentioned that the ship on which he served was the President Roosevelt.

"The one that rescued the Antifone crew?" asked the court. Roberts admitted to being one of the heroic Roosevelt sailors, who later shook hands with the mayor and was many times decorated. The magistrate apologized for having previously held him. The fine was revoked and a suspended sentence substituted.

STUDY PUEBLO PAGAN ANNALS

Seek Light on Early Franciscan Martyrs.

Santa Fe, N. M.—Brothers of the Franciscan order of the Roman Catholic church in the Southwest are preserving the traditions of their organization which arose from the martyrdom of priests who passed centuries in the conversion of the Pueblo Indians from their pagan beliefs to Christianity.

Much research work is being done by scholars to bring to light the facts of the spiritual conquest of the Pueblos, which they believe to be one of the most colorful pages of the history of the Americas.

Father Theodocus Meyer, after considerable study in the archives of the mission at Santa Barbara, Cal., has compiled a list of 51 members of the order who gave their lives in the period from 1542 to 1696.

The result of this search contrasts the religious brothers with the proud conquistador, the one for the prize of mystical gold and gems, the other for the prize of human souls.

The history of the Christianization of the Indians showed that there were waves of persecution of the priests at intervals of 40 or 50 years throughout nearly two centuries.

They reached their climax in 1690, when the Pueblo Indians rose in rebellion against the tyranny of the Spanish rule, and killed nearly every white man in New Mexico. By prearranged plot, 31 missionaries in a score of pueblos, many of them 100 or more miles apart, were killed on one day.

TRAVELED PUSSY

Mrs. Metje Roffi, wife of the former vice president of the Italian Bank of Commerce of New York, with "Minnie," prize cat that accompanied her to Europe and back on the Conte Rosso. The cat was listed as a first-class passenger and her meals each way were \$10. The cat is wearing a blue ribbon awarded her in a cat show in Geneva.

Nebraska U Arranges Exchange With Mexico

City of Mexico.—Negotiations looking toward an exchange between the United States and Mexico of scientific and research knowledge have been conducted along successful lines in the last two months between the University of Nebraska and the Institute of geology of the Mexican government.

Prof. E. F. Schraum, chief of the department of geology and paleontology of the University of Nebraska, is the chief power behind the movement to bring about an exchange between the countries of fossils, minerals and meteoric stones. John Zozaya, secretary of Judge E. B. Perry, American commissioner at the meetings of the special claims commissions, was commissioned to initiate the move to strengthen the scientific collections now existing in both countries with such specimens as each country is able to supply, which the other has not got.

It is pointed out that there exist many fossils and other objects of scientific value in Mexico which are not to be found in museums in the United States and vice versa.

Six Million Criminals in U. S., Records Show

Washington.—Statistics, disclosing that about 6,000,000 Americans at some time in their lives have indulged in criminal careers, were obtained at the Department of Justice.

About 3,000,000 have been accused in the courts. The other half, although at some time guilty of offenses for which they might have served terms in prison, have escaped the vigilance of the police.

The estimate of the criminally inclined population was made by department experts on the basis of the fact that finger-print records of 1,013,000 criminals are on file in the bureau of identification.

He's Cautious

Richmond, Va.—One Virginian is going to be a bachelor, for a while at least, because of his caution. To the questions of the clergyman, at his wedding, the cautious groom insisted on replying: "I'll do the best I can." The ceremony was called off and the license returned to the county clerk's office.

Veterans Get Checks

Ex-Service Men Receive Dividends on Government Policies

Chapel Hill Weekly.

Several of the World War veterans in Chapel Hill recently received from the United States Treasury checks in payment of dividends upon their government life insurance. One man who carries a 20-year endowment policy for \$2,000, and who has paid premiums for one year, got a check for \$3.62; another who has a \$5,000 endowment policy got a check for \$9.00.

July first, six weeks hence, is the last day upon which lapsed government insurance may be reinstated or the original term insurance may be conveyed into one of the many forms of policies issued by the government. The choices embrace ordinary life, 20-payment life, 30-payment life, 20-year endowment, 30-year endowment, and endowment at the age of 62.

Application blanks may be obtained from either George Lawrence or Carl Durham of the Chapel Hill post of the American Legion; and Mr. Lawrence will assist any veteran in making out his application in the manner required by government regulations.

Quit Getting Up Nights

QUIT GETTING UP NIGHTS A Healthy Bladder Acts During the Day

C. N. Shuman, Republic, Ohio, says: "Before taking Lithiated Buchu (Keller Formula) had to get up six or seven times each night. Now I do not get up at all. You may use my name if it would benefit anyone with bladder trouble." Be careful not to take drugs that check the action of the bladder. You may have to continue its use. Lithiated Buchu (Keller Formula) increases the action during the day. It cleanses the bladder as epsom salts do the bowels driving out foreign matter, neutralizing excess acids, thereby relieving the irritation which causes "Getting Up Nights." The tablets cost 2c each at all drug stores or Keller Laboratory, Mechanicsburg, Ohio.
