

A SUGGESTION TO MY FRIENDS

The fall season is here. Would it not be wise to place your orders for your winter suits, made to your individual measure while stocks of choice fabrics are full? There is a rush on now, and will be for some two days or more, after which patterns of fabrics of the most desirable goods may be broken. Why not have your measure taken? Place your order to be shipped out any date between now and November 1st? My line of new and complete, with prices ranging from \$25.00 to \$60.00, every yard of cloth all wool.

I am agent for the International Tailoring Company, of New York and Chicago, and the Homeland Tailoring Company of Baltimore. I will appreciate your orders and take pleasure in serving you. Call on me or let me call on you.

SIGNS COULD LIGHT GOOD-SIZED TOWN

Enormous Power Used on "Great White Way."

New York. — Broadway's Great White Way uses enough electric power in its signs to provide for all needs of a town of 10,000 population.

These signs, flashing intermittently or standing in great banks of light, throw 25,000,000 candle power into the street, with a night current consumption of 17,800 kilowatt hours, it has been determined by the New York Edison company.

This display, dedicated to advertising, has grown from a little sign with 200 lamps placed where the Flatiron building now stands, which, in 1895, heralded: "Manhattan Beach Swept by Ocean Breezes."

However, economy is exercised even in this prodigality of light. The theater signs are lit at dusk, but often turned off before the performances are over. Many of the large signs shine only at specified hours when the large crowds are on the street. Supper clubs often do not light their signs until late, when they wish to attract after-theater groups.

Theaters Rank Seventh.

There are 18,000 signs now on Broadway, with a present increase of about 5,000 annually, until space in which to hang or set them is at a premium.

Theaters, which originally made the otherwise drab street what it is, have dropped to seventh in the classification of users of signs, with about 700 displays. Restaurants lead the procession, with 2,885. Tobacco companies are near the top, with 1,100.

In the most desirable spaces, the roofs of the buildings often bring a higher rental than offices. One four-story building, only eight feet deep, erected solely for sign displays, brings an annual rental of \$90,000.

The largest sign in the world recently was demolished when the building holding it was wrecked. It contained 21 miles of wiring, was 200 feet long and was as high as a five-story building.

Since its destruction, a sign atop a rubber company's building, advertising the company and its tires, is numbered among the largest. Facing north and south, the double display is set in a frame 38 feet wide and 53 feet high. Its illumination is estimated at 250,000 candle-power.

Enormous Power.

A sign advertising a show upholds the theater's visual prestige with 200,000 candle-power of illumination, while an automobile sign, covered entirely with bulbs over an area 50 by 64 feet, totals 175,000 candle-power.

Two other signs, both of great size, stand high in the sky, one of them being that of another tire concern, a double display 354 feet above the street. Nearby is a bank sign, an 80-ton structure resting on the steel columns of the building 347 feet above the street.

A "color animation" sign, considered a radical innovation in display, made its appearance in advertising the motion picture, "Don Juan." This new sign, employing the colors red and blue, makes it possible to create the illusion of 14 different motions by figures on it.

The Great White Way is not only for the benefit of visitors to New York, but has a peculiar place in the heart of the city. When the signs were dimmed during the war in the interest of conservation, such a protest was raised that they were turned on again within a few days.

Errant Wife Killed in Bed by Mate With Ax

New York.—Because his attractive wife had found other interests and refused to remain home at night, Antonio di Palo, twenty-seven, a laborer, killed her in bed with an ax, he confessed to police.

According to neighbors, Mr. and Mrs. di Palo had quarreled recently because the pretty young wife dressed in her best and went out nights. She took in sewing and told her husband she was using her own money.

She returned at eleven o'clock the night of the murder, her husband told the police, and he asked:

"Rose, don't you care for me any more?"

She gave him an abrupt answer, he said, and they went to bed. At six o'clock di Palo awoke and tried to kiss her. She rebuffed him with a curse, he said. He got an ax from behind the bathtub and killed her. Then he dressed in his best clothing and left the house.
