Organ Is to Neutralize Malalarial Toxines.

FOUND BY PHYSICIAN

PURPOSE OF SPLEEN

San Antonio, Texas .- Discovery of the purpose of the spleen, a puzzle to most scientists and physiologists, has been made by Dr. Charles A. R. Campbell, scientist and fever specialist of San Antonio.

The spleen, Doctor Campbell told the county medical society, is to neutralize the toxins thrown off by the malarial parasite, thereby perpetuating the disease by preventing the host (the body into which the parasite enters), man and the parasite from being overwhelmed by the toxins.

His discovery, the doctor said, places malaria in a new and different light and shows it to be a plan of nature's for the human being to carry and diffuse the disease.

Doctor Campbell's finding was accidentally brought about in his study of bats, for which he has received recognition in many parts of the world. In dissecting bats in 1903, he found v. 1926, to the under- that the bat's spleen relatively was to secure the payment 3.25 times as heavy as the spleen of ound therein described, man. This was the clue that led to

Doctor Campbell's findings have been accepted in the Texas State Medical Journal. He sent a copy of his vill, on Saturday the report to Lieut. Gen. Giovanni Maber, 1926, in front rieni, chief of engineers of the Italian door at Pittsboro, army, because Italy was the first na-12:00 o'clock noon tion to recognize his work on the hygienic value of bats as eradicators of malaria.

For 28 years Doctor Campbell has studied bats and has erected bat ginning at the mouth | roosts near the city, where thousands ch on Rocky River; of the creatures live. Due to his work, th 39 degrees east by San Antonio has the only municipal

Cheap Cuts of Meat Are

Best Buy for Home Use Columbia, Mo.-The number of calories in a beefsteak does not depend on what the housewife pays for it. In fact the best bargains in calories are the cheap but tough cuts and the stylish porterhouse is the worst buy on the entire carcass. Dr. A. T. Edinger of the University of Missouri agricultural experiment sta-

advantage, in some ways. the clod or chuck produced the most | That was enough for the exporters.

MILLIONS FOR NUTS Half a Million Tons Pur-

chased Abroad.

WHERE U. S. SPENDS

Washington-A government agency states that nuts must be added to the list of supplies for which the United States is dependent upon the world. Last year America bought for about \$50,000,000 a half million tons of nuts or nut products, including chestnuts, walnuts, coconuts, and copra, palm nut oii and pecans, Brazil nuts, almonds, filberts and peanuts. The peanut, which is classified as a nut by the government, accounted for 36,000 tons. "The nut tree has not been taken seriously by Americans until recent years," says a bulletin of the

National Geographic society from its headquarters in Washington. "The Indian and the ploneer respected its gifts, but for many years a nut tree existed in America, only to provide a happy outlet for the excess energy of small boys in the fall.

"America would be importing many more tons of nuts but for the fact that Americans have gone in for nut crops within the last twenty years. Pecan orchards have been planted in Florida, Georgia and other southern states; walnut and almond orchards have been planted in California. The peanut, of course, is a new world native by birth, and a standby in Virginia and the South. Nevertheless, America still must look abroad for nuts, especially those produced in the tropics.

Where does America shop for nut meats? She goes to Tobago, Trinidad, Jamaica, the Philippines and South Seas for coconuts; she goes to Brazil for Brazil nuts and babassu nuts; to Lagos, Liberia, and Sierra Leone for palm nuts; to Italy and Spain for almonds, filberts and pignolia nuts; to Syria and Palestine for pistache nuts; and to France for English walnuts and chestnuts. Walnuts also come from China, Italy, Spain, and Chile in some quantities. On the Trail of the Elusive Walnut.

An American investigator went to the Orient to study the Chinese walnut industry. His experience throws light on the odd sources of our nut meats. Shanghai, he knew, was the main tion has made an economical study of shipping point for millions of pounds the American piece de resistance and | of walnut meats coming to the United finds that the poor for once have the States. Arriving there he called on the exporters and asked how to find He found that a rib roast is more the Chinese walnut orchards. No one economical than a loin roast, but that knew. They came from the interior.

of protein or muscle-building material in a pound of the lean portion, Dr. muscles and fat animals more fat and less protein. Therefore it is best to buy from a piece that is just medium fat.

Family Holds English

London .- England's rat-catching record is held by the Jarvis family, three of whom are girls. Bags of 700 to 1,000 rats a week are nothing out of the ordinary for the Jarvises.

Misses Nell and Kitty Jarvis, twenty-one and twenty-three, respectively, are on the rat-catching job every night in the week, often assisted by their sister, Rose, who is twelve. They also accept extermination contracts where cockroaches, mice and black beetles are concerned.

The girls come by their rat-catching abilities quite naturally, as they were taught by their father, John Jarvis, official rat catcher to the London county council, and to most of the government offices.

Jarvis claims to be the only rat catcher in Great Britain whose father and mother and grandfathers on both sides have followed the same trade.

Big English University for Mount of Olives

Jerusalem.-- A \$250,000 English university is to be built within the next two years on the slope of the Mount of Olives. The nucleus is the present English college in Jerusalem, also known as the Anglican Bishops' mission. The enlarged scope of the institution will be modeled after the American university at Beirut.

The Meraat el Shurk, the anti-Zionist Arab newspaper, welcomes the proposed English university at Jerusalem, declaring that it will counteract the influence of the Hebrew university and will tend to revive Arab learning and Arab nationalism.

Keen Policewoman

London .- Commandant Mary Allen, co-founder of the women's police service, has become known as Europe's "flying cop," since she is one of the most traveled police officials in the world. When possible, she makes her trips by airplane. She thinks nothing of flying to Paris, Berlin or other points in one day, on some important case in which a woman is involved, and back to London the next. The setting up of a women's international police commission was due primarily to efforts of Commandant Allen.

Much Oil From Whale

ons.

The quantity of oil obtained from an average whale is about 2,000 gal-

But the American found a Chinese as-

Shansi province. "'Strange,' the American investigator -A steer that is neither too fat nor said to himself when he reached Taitoo thin provides the largest amount yuanfu, 'there are no walnut trees in sight.' But he was soon put right by a citizen who told him that the wal-Edinger found. Thin animals have nut trees were exactly 100 miles farmore water and less protein in their there on, at Fenchow. He obtained one of the 18 motor cars in Shansi province and started off for Fenchow. The American reached his destination only to be informed that the walnut trees, as a matter of fact, were 25 miles farther on. Although the nuts were similar to the English walnut of

Rat-Catching Record California, the Bear state has no such walnut trees to show as the investigator found deep in China. "In another part of the world tongues are wagging over a new and

probably important development in the nut trade. Beside the northern tributaries of the sprawling Amazon grows a palm tree which produces the babassu nut. Probably the babassu gave inspiration for the phrase, 'a hard nut to crack.' Its spherical shell, about the size of a baseball, has seen known to withstand six tons' pressure! The prize for the strong man who can crack a babassu is a group of nut meats the size and shape of shelled Brazil nuts. Each nut meat will burn readily and can be used as a wickless candle. Babassu meat is 66 per cent oil, which is said to be the only nut oil that can be substituted for coconut oil.

"To Americans must come much credit for putting nut growing on a business basis. The walnut orchard, the pecan orchard and the almond orchard are largely American institutions.

Coconut Puts Lather in Lather "Almonds are grown all around the

Mediterranean basin, but the United States gets her chief supplies from Italy and Spain. Anatolia, Syria, Greece and North Africa ship to northern Europe. The Orient also looks to the Mediterranean for almonds. Practically the entire Italian supply of shelled almonds goes to India, where it is an essential to some of the famous

Indian dishes. "Recent exposures of cream dilution. with coconut fat in New York city give some hint to the uses of the coconut. Its role as an edible nut is small compared to its part in the modern industrial scheme as maker of oleomargarine, soap and salad oil and candles. It also is widely used in shav-

ing cream manufacture to impart a lather-producing quality. "An all-important nut which is not edible is the palm nut. The African Gold Coast ships thousands of tons an-

nually to the United States for soap. caudles, coloring for butter substitutes, beat-resistant paints, shoe polish and for lubrication of cutting tools.

"The tin plate industry is one of the heaviest buyers of palm nuts. Palm oil is essential to the making of that necessity of modern civilization, the tin can. Thin sheet iron after being passed into its bath of molten tin must be brought through palm oil, floating on the hot metal, when it emerges with its shiny tin coat."

This the 10th day of Sept., 1926. E. B. HATCH, Clerk of the Superior Court for Chatham County.

NOTICE OF LAND SALE

Under and by virtue of the powers contained in a certain Deed of Trust executed on the 6th day of December 1926; by J. H. Love and wife to V. R. Johnson, Trustee, and duly registered in the office of Register of Deeds for Chatham County, N.
