

THE CHATHAM RECORD

O. J. PETERSON Editor and Publisher

SUBSCRIPTION PRICE: One Year \$1.50 Six Months .75

Thursday, February 9, 1928

It is a gratifying announcement that the J. I. Case Threshing Machine Company makes in this paper. After reviewing the possibilities of the Chatham agricultural, as well as actual achievements, the announcement sets forth that Mr. H. A. Bynum has been appointed the Company's representative in this county.

The greatest disadvantage in having the paper printed out of one's own shop is that we haven't a chance to read the proofs, and thus, get a chance to detect our own blunders and those of the printers. "O. J.", in his column in the Greensboro News, catches us on the use of "Tyson's" for "Tryon's" in our New Hope article of two weeks ago.

It seems that there is not as much freedom in North Carolina as the newspapers including The Record, supposed in their comments last week upon the Rassett fight of 25 years ago.

Three billion dollars cut from the European debt to this country would do more toward off war than the greatest navy in the world.

America and France have signed a treaty outlawing war as the means of settlement of disputes between the two countries.

ly unarmed, it seems apparent that the biggest navy in the world can be aimed only at Great Britain, and there is no likelihood of England's attacking America.

Editor J. P. Cook of the Uplift, commenting upon a recent occurrence in Concord a few weeks ago, when a difficulty arose in securing an operation for a poor but gentle woman who was on the point of death without an operation, says:

"The rich and poor alike are beneficiaries of public education. It is an accepted duty. Is not the public health a duty? Why let a poor, worthy woman go without hospital treatment, which she is unable to provide, and which would restore her to service or save her life? That is apparently the attitude of our community at this time.

"The Uplift is aware that there are organizations that play at this service, and that there are private individuals that respond to call for help in these unfortunate cases.

It is said that Al. Smith is hesitating to announce himself as a candidate for the presidency until he is satisfied that he has a chance to be elected if nominated.

DIVORCEE MARRIES IMMEDIATELY

The following item from the Durham Herald of one day last week indicates that Dossie Bone, who secured a divorce from his wife Lula Bone, at the recent session of court, lost no time in getting him another wife.

tation, between the Fayetteville and New Hope Valley roads, reported to the Durham police yesterday that his daughter, Bessie Allen, had run away from home to marry Dossie Bone.

STUDENTS ESCAPE FROM BUS FLAMES

DURHAM, Feb. 2.—Twenty eight graded school children, their teacher and the bus driver, today had narrowly escaped serious injury when the Oak Grove school bus, Durham county caught fire.

Witnesses said the little tots were hardly out of the truck at the school building when fire spread over the entire building and demolished it.

TODAY

A COURAGEOUS IRISHMAN A HOLLOW MAGNET A VARIEGATED CLIMATE. MORE AEROPLANES NEEDED.

By ARTHUR BRISBANE

A real fighting Irishman has come to America. William Thomas Cosgrave, President of the Irish Free State. Diffident, keen blue eyes; soft voice, iron will and a lion's courage.

If you asked, "can Nothing be more powerful than Something?" you would get no serious answer.

But how do you explain this fact, announced by German science and proved by convincing experiment? A hollow magnet is more powerful than a solid magnet.

The absence of magnetized metal inside the magnet increases its magnetic strength. A magnet containing four hollow lamellae has as much lifting power as one containing nine solid lamellae.

Everything is possible in chemistry and physics, now that atomic construction and the horrible power and speed of the tiny electrons have been added to human knowledge. But that hollow magnet news is a thing to puzzle science.

A. D. Lasker, who ran the Shipping Board, once a young, frightfully energetic boy, sitting in the outside office of Lord & Thomas in Chicago, now even more frightfully energetic, sits in the inside office and owns the place.

He and his wife have just given a million dollars to Chicago University to study the "causes, nature and prevention of degenerative diseases.

Within three hundred years, the average life has increased from thirty to sixty years, but a man of fifty has very little better chance of life than a man of that age one hundred years ago.

Lasker wisely gives money to find out why it is that human beings after fifty break down so quickly.

If the scientists will let him, Lasker should use some of his money investigating suggestions that medical science would call "all nonsense." All nonsense is what the doctors called the theories of Pasteur, who taught them more than they ever knew before.

Michael J. Hinch, eighteen years old, touched a live wire carrying 5,000 volts and, according to doctors, was "dead for half an hour." Quick action by firemen brought the boy back to life.

Dr. Frank Crane Says

The Calendar

A questionnaire was sent to 1,000 the Northern and Southern hemisphere representative firms the other day in regard to a new calendar of thirteen 28 day months.

Calendar table with columns S, M, T, W, T, F, S and rows of numbers 1-28.

At first his mind wandered. Then he recognized friends, knew his own name, who he was and what he had been doing in the previous eighteen years.

The question arises, does the same thing happen to all of us, after we have been dead a long time, perhaps as one earnest clergyman suggests, as long as a billion years, waiting for the world to end and Gabriel to summon us?

We have a variegated climate, dogs pulling sleds over Alaska's ice, ladies and their friends lying half-naked on the sands of Florida, California and the Gulf states.

And the thermometer does not tell everything about weather. We

tornia and the Gulf states. While Donald McMillan, Arctic explorer, sent word, through radio, that he is quite comfortable at Bowdoin, Labrador, with the temperature 35 below zero.

It depends on humidity, elevation, ozone and other things probably of which we know nothing.

A dispatch from Nicaragua says Sandino, the rebel-bandit who killed some of our marines, has been killed by a bomb from one of our airplanes.

The Nicaragua rebels now know that they have no more chance against United States flying machines than a rabbit against eagles. That is satisfactory so far as our

Nicaragua fight goes.

But our President, Congress and Army and Navy departments should remember that several countries in Europe and at least one in Asia exceed us so greatly in air power that they could do to us, if they chose, what we have just done to Sandino.

We need fighting airplanes, not merely a sample force of the Nicaragua size.

The Emperor of Japan sets an example in economy—carries a \$5.00 watch, cultivates his own rice field. That would surprise his great great grandfather. That Mikado, by lifting a finger, could chop off anybody's head, and he did.

S'MATTER POP?

by C. M. Payne

Get On The Band Wagon

Scarcely a day passes without the addition of new names to The Record subscription list. Two new subscribers have enrolled right here in the office in the last few hours, and when the editor has a chance to go out after them they come in by the dozen.

There Is a Reason

To know what is going on in Chatham county and what the people are thinking about, it is necessary to read The Record. Get on the band wagon. You will find many a paper worth half the price of a year's subscription, if you care to be informed of the affairs of your county.

This is a campaign year. National and State politics are already warming up. County politics will soon begin to simmer: You want to know about it. Read The Record. Three cents a week is all it will cost you, and you are a mighty poor man if you let that trifle keep you off the list.
