Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pain—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

B. H. Broiles, editor of The Mexia (Texas) News, says:

That the blackest thing in the world, ink, brings more enlightenment than any other substance. The history of education, personal, national and community progress and prosperity is written with ink. Without ink there would be no Bible, no law book, no school book, no newspapers.

The most effective use of the dusky servant is the rapid distribution of ink with the printing press, and the most practical use of the printing press is the newspaper page.

Our national prosperity is based on the use of printers' ink, rather than our credit system, our installment buying, our high wages, rapid transportation or natural resources.

Newspaper advertising—the most common tool of the dusky servant—is the basis of big business success and can be made the foundation of prosperity for the smaller business of the country.

**TOWN PROGRESS TALKS**

Success is won, the great men tell us, by concentrating on the job at hand. Any golfer knows that the man in our cartoon has a very small chance of putting the ball into the cup while his gaze wanders over the landscape. "Keep your eye on the ball" is good advice in business, as in golf. If your business does not yield satisfactory returns, perhaps it can be made to do so. Inform yourself on all the new wrinkles in your line and use them. Advertise, install new equipment, give your customers better service, see how much you can do for the public. Do this, and it's likely your business will develop to such an extent that you will envy nobody, and have no desire to move to another city.

**CARNES' SETTLEMENT GIVEN APPROVAL**

The executive committee of the Southern Baptist convention last Friday voted unanimous approval of the manner in which the home mission board handled the Carnes case. There had been much criticism of the board for agreeing to a mild sentence on Carnes, former treasurer, who embezzled nearly a million dollars of mission money.

When you see someone standing in line before the Receiving Teller's window you may well say, "There's a person who wants something badly enough to save for it." A dollar and a minute of your time will suffice to open an account—an account that will grow through accumulated interest as well as augmented savings. Rothschild once said, "You can't get poor taking a profit."

**A Case User Says:**  
"The Case feeder can't be beat, as you can feed to suit conditions, either high or low to the cylinder. Then just the right amount of straw that you see fit to put through to get best results."

**Your Profit Depends**  
**on 4 Operations**

**THE** profit to be made from threshing your crops or those of your neighbors depends largely upon how well your thresher performs these four operations: (1) feeding; (2) threshing; (3) separating; (4) cleaning.

Let us discuss the first one here, for feeding is the key job that largely affects the other three.

You want a thresher with a feeder that can be set to feed high or low on the cylinder as conditions may require. High, when the bundles are damp, or the grain is tough or tangled. Low, for dry, easily threshed grain. Only a Case thresher can give you this important and exclusive feature. This adjustment can be easily made while the thresher is running.

You want a thresher with a feeder that gives you complete control of the straw. In a Case, the volume is controlled at two points—by the straw shoes and upper feed rakes. Result, maximum capacity without overloading the cylinder. Another exclusive Case advantage.

When you own a Case thresher you have no worry. Whether the grain is long or short, wet, damp or dry, straight or tangled, the efficient Case feeder responds always with a uniform and continuous stream of grain to the cylinder. No crop is too difficult to thresh.

And so it is with the Case thresher all the way through. Its many exclusive features will save your grain and make more profit for you. Its simplicity makes it easy to operate. Come in when you're in town.
