

**Gulf B. Y. P. U. Entertains**

The members of the B. Y. P. U. at Gulf happily entertained their parents Saturday evening July 27th, at the home of Mr. and Mrs. D. M. Tyner.

The banquet table was laid for fifteen and daintily decorated with green and white paper and green flowers. Mrs. Tyner was the delightful hostess. The banquet was served in three courses. Those serving were Grace Perry, Blanche Wilkie, Annie Tyner, Tommie Hart, Hoyle Causey and Billie Beal.

When the guests were seated, Mr. Tyner returned thanks, and Viola Johnson welcomed them. Short talks were made by Mr. D. E. Murchison and Billie Beale. Mrs. J. R. Moore was toast mistress.

The members of the B. Y. P. U. sang several songs and gave some yells for their parents.

At the close of the banquet, every one joined in singing "Blest be the Tie."

The guests present were, Mr. and Mrs. D. E. Murchison, Mr. and Mrs. N. H. Perry, Mr. and Mrs. E. B. Wilkie, Mr. and Mrs. W. A. Beal, Mr. and Mrs. J. W. Johnson, Mr. and Mrs. D. M. Tyner, Mrs. Lucy Beal, Mrs. R. L. Causey and Mrs. J. R. Moore.

**CAROLINA MOTOR CLUB TO HAVE AIR DIVISION**

The Carolina Motor Club is installing an air traffic division. In a few days all of the permanent offices of the club will be stocked with airway maps and complete information relating to air travel. This is the latest wrinkle in "service" to members of the association.

**WANTED 200 WOMEN**

to see the white and blond Pumps and sport Oxfords. You will all buy a pair when you see how much the price has been cut for quick sale.

**STROUD & HUBBARD**

The Shoe and Hosiery Store  
Sanford, N. C.

**10 DAY SALE**

Starting Saturday, August 3rd, we are putting on one of the biggest price slashing sales in the history of our town. Our entire stock including SHOES, DRY GOODS, NOTIONS and GROCERIES has been reduced to the very bottom.

COME AND SEE THESE WONDERFUL VALUES AND BE CONVINCED

**C. B. CRUTCHFIELD**  
MONCURE, N. C.

**Do you know your town**

One of the many attractive features of

**DURHAM'S AUGUST**

**"Clear-Away" Sale**

**THURSDAY, FRIDAY, SATURDAY**  
**AUGUST 1, 2, 3**

will be the following contest:

In a number of store windows on Thursday morning will be photographs taken in your town. The first person entering that store and telling where the photograph was taken will be presented with \$5.00 in merchandise by that store. Just prove that you live in that town.

A score of Durham merchants are cooperating to make this a real value giving event, so plan to be in Durham on these days.

**Where Money Comes From and Its Outgo**

The largest percentage of each current expense dollar for schools comes from local and county ad valorem taxes and the largest percentage of this same dollar is spent for instructional service, according to the current issue of State School Facts, the official publication of the state superintendent of public instruction.

School Facts carries in this issue a chart showing by percentages the source of all current funds, as well as the phase of school operation for which it is spent; or as the chart states, "where it comes from" and "what becomes of it."

In other words, out of every dollar received for the current operation of the schools, 54.9 cents comes from county wide ad valorem taxes, 21.4 cents from local district ad valorem taxes, 13.6 cents from state funds, 5.1 cents from poll taxes, fines and forfeitures in the county, 3.5 cents from the preceding year's balance, and 1.5 cents from miscellaneous sources.

On the other hand, for every dollar spent, 77.2 cents is for instructional service, that is the salaries of teachers, principals and supervisors and instructional supplies; 7.6 cents for auxiliary agencies, that is transportation of pupils, cafeteria and book stores; 6.2 cents for the operation of the janitor and other employees, fuel, water, light, power and janitors' supplies; 5.2 cents for general control, or the expenses of the board of education, the salaries and expenses of superintendent, attendance officer, and clerical and office expense of the administrative officer; 2.6 cents for maintenance of the school plant or such expenses as repairs, replacements and upkeep; and 1.2 cents for fixed charges—rents and insurance.

**Instructions**

The beautiful creature was just leaving the hotel where she had stayed for the past year.

"This is my address," she said to the clerk.

"But if any letters come from a tall, dark man, throw them in the waste-paper basket."—Tit-Bits.

**Returning a Favor**

Wife (reading a newspaper): "Here's an account of a bachelor who left all his money to the woman who rejected him."

Hubby: "And yet we are told there's no gratitude in the world!"—Passing Show.

**That Kind**

Tall: "Boy! She's the kind you read about in books!"

Short: "What kind of books have you been reading?"—Judge.

**Pitching to Babe Ruth**

By RING LARDNER

To the Editor:

This is just a few items of information about a ball player that maybe you have never heard of him so I will tell you his name in the first paragraph and his name is George Ruth, but they call him Babe on acct. of him being over 6 ft. tall and pretty near as wide and he is a great left hand pitcher that don't pitch.

Well, 1 day in May I had seen a whole lot of sporting events that bores you to death and the White Sox from old Chi was playing in New York City so I thought I needed a little more boreing, so I went to the Yankee's Stadium and went down to the bench and Mgr. Schalk was setting there and he says hello to me but I just made a face at him, but he asked me to set down a minute and a boy named Thomas was going to pitch and he was out there warming up and finely he got warmed and came into the bench and Mgr. Schalk said:

"Come here and sit down a minute, Tommy, as I want to talk to you."

So Tommy set down and Mgr. Schalk said to him:

"Say, listen Tommy. They's a man on this New York club named Ruth and he isn't Cobb and he isn't Speaker or Sisler or Jackson. He is a bird that if you ever throw a ball where he can reach it that ball won't be available for tomorrow's game and baseballs cost as much money as other commodities now days, so if you don't mind, why when this guy comes up there don't pitch him anything that he can lay his bat against it, but roll the ball up there on the ground and I'll take the consequences." So Tommy said: "Yes, sir."

Well, they started this game in the first inning and the White Sox didn't do nothing, and it come the New York's turn to get their innings and there was 1 out and Koenig got on 1st base and along came Ruth. The next thing I seen of that 2 dollar ball was when it was floating over the right field bleachers. So when Tommy came into the bench Mgr. Schalk says what did I tell you and Tommy says I didn't mean to pitch it where it went.

So the next time Babe come up all he got was a 3 base hit because they were pitching more carefully to him. Well, after a while it become necessary to put in a pinch hitter for Tommy and Red Faber was sent in to finish the game. Mgr. Schalk didn't tell Red where to pitch to Babe because Red's what you might call an old timer, so Red pitched one at this bird's Adam's apple and he hit it into the right field stands for another homer, as I have nicknamed them.

Now this isn't no reflection on neither of these pitchers with I hope is both friends of mine, but if I was managing a ball club in the American league, I would tell them how to pitch to this bird. I would stand on the mound and throw the first ball to first base and the second ball to second base and the third ball to third base and then I would heave the fourth one out in the right field, because he couldn't be in all those places at once and furthermore, they's a rule that makes a batter stand in the batter's box and if a person pitches in that direction with this guy up why all you can say about them is that they are a sucker

For inst. the last time the White Sox was here a certain prominent Chicago baseball writer was setting next to Col. Ruppert that owns the Yanks, and this Geo. Ruth comes up and the brewery king says to him, how much will you bet that he don't crack one out of the park on this occasion. So the baseball writer says what's the proper odds? So Jake says, well I don't want to cheat you and I'll bet a pt. to a qt. that he murders one. So the sucker took it and the first ball was a foul that went into Mr. McCurdy's ft., and the next was a ball and then the old boy took one right over the middle for another strike and the next one hasn't yet been located, but when last seen it was soaring over a cigarette sign in right center.

Another way to make him stop hitting home runs off of you is to refuse to pitch when it's his turn.

The most useless thing in the world when this guy's up there to bat is the opposing catcher, because if you can throw a ball past Mr. Ruth why it don't make no difference if it's caught or not, where as if you try and throw one over the plate it won't never get as far as the catcher.

Once a guy came here with the St. Louis Browns and struck the Babe out three times in one afternoon, and if he is smart he will let that go down into posterity, and the next time they tell him it's his turn to pitch vs. the N. Y. club he will say he has got a sore arm.

**Regular Crowd**

Professor Pickering once let the late Richard Harding Davis look through a marvelous microscope to prove that there is always some organism down to the most minute atom of life.

When it came time to go the noted author said:

"Professor Pickering, when I came in I thought I was an individual; I leave knowing myself to be a community."—Los Angeles Times.

**How to Raise Poultry**

By Dr. L. D. LeGear, V. S. St. Louis, Mo.

Dr. LeGear is a graduate of the Ontario Veterinary College, 1892. Thirty-six years of veterinary practice on diseases of live stock and poultry. Eminent authority on poultry and stock raising. Nationally known poultry breeder. Noted author and popular lecturer.

**PULLET WILL MAKE PROFIT WHEN COLD WEATHER COMES**

Depend on the Youngsters for Heaviest Laying in Fall and Winter Months When Prices are Highest. Says Dr. L. D. LeGear, V. S., of St. Louis, Mo.

"Youth will be served" so runs the old proverb. Of course, no reference to poultry was intended, but it happens to fit just the same. As a rule, pullets lay more eggs during their first laying season than during any subsequent season. Consequently, if hatches are correctly timed so that plenty of pullets will be brought to maturity some time during the latter part of August or September, a banner winter egg season is bound to follow. Pullets hatched during February or March, according to breed, should begin laying just about the right time for winter eggs.

Pullets should not be allowed to come into maturity too quickly. Normally, a pullet starts to lay eggs as soon as she has reached maturity and her body has ceased to grow. Sometimes laying starts somewhat before full growth has been reached and further growth may cease. Such pullets may remain undersized and their eggs may be defective and small. If pullets are maturing too rapidly their mash and animal food should be reduced. The grain rations may also be slightly increased, as pullets should have a good reserve store of body fat before they start laying. Otherwise they will not stand up well under the strain of laying and may fall considerably short of the possible maximum egg production. For that reason, many poultry men make a marked increase in the quantity of grains fed to the pullets as their combs begin to redder. At the same time, they cut down on the mash and animal food; beef scraps or similar material. The grain is fattening, whereas the animal food being no longer required for muscle building as the birds reach maturity, may start egg production before it is desirable.

It is usually considered better not to force pullets into premature laying by feeding large quantities of mash. Instead, limit the mash until pullets are quite ready to lay and, by feeding a greater amount of grain, to get them fat. Such a ration emphasizes the fat making material and, by withholding the eggmaking materials, removes the danger of a too early maturity. Mash should not be entirely eliminated, as it contains materials needed for building up the muscles of young fowls. Too much of it, however, may precipitate egg laying before it is desirable. Give the developing pullets all the grain they will eat during early fall and after they come into normal laying, gradually decrease grain with a corresponding increase in mash feeding.

If pullets have been properly developed along the lines just described above, they should begin laying just as they are put into winter quarters. Their quarters should not be changed once they start laying. Such a change will usually cause a molt and falling off in the egg yield. Furthermore, pullets should never be housed with older hens. The more mature hens annoy the younger ones and that too interferes with their laying. From this point on, the usual rules for feeding and handling laying hens will apply for winter egg production.

Of course, I do not mean that older hens are incapable of winter egg production merely because I have emphasized the disability of developing pullets for that season. With proper culling, breeding and feeding, hens can be made to lay almost as many eggs during the winter months as in warmer weather. The subject of special feeding and handling of fowls for winter egg production is, however, of sufficient importance to constitute a separate article all by itself.

The reason for emphasizing ways of increasing winter egg production is, of course, that prices reach their very highest peak at that time. It is, therefore, desirable not only to produce as many winter eggs as possible, but also to market every possible one of those that are produced then. Practically all of them can be marketed by preserving and keeping for home use the low priced eggs of spring and summer.

It is very easy to preserve eggs for future use by putting them down in water glass, a syrupy liquid that can be obtained from almost any druggist. This water glass should be mixed with nine parts of cold boiled water and the solution kept in crocks or stone jars. Kegs or barrels may also be used if absolutely clean and free from odors provided they are thoroughly scalded. Fill the jar or keg partly full of the water glass solution and put in the eggs from day to day as they are gathered. Be sure there is always at least two inches of solution over the eggs. No dirty or cracked eggs should be used nor any about which there is any doubt as to when they were laid. They must be absolutely fresh, laid the same day they are put in the solution.

The cost of preserving eggs in

this way is very small and calls for almost no work at all. Eggs in water glass will keep for six or eight months if stored in a cool, dark place, well covered, and may then be used for all cooking purposes or for the table. The advantages of this plan certainly should be apparent without argument.

I have not attempted to go into any great detail in this article. On the contrary, I have tried only to suggest enough so the reader will want to know more about methods of increasing the winter profits from his flock.

**THE CYNIC**

I wouldn't stir myself ten feet To see a football game; Not worth the trouble, I repeat— Besides, they're all the same.

You pay three bucks and then you get A seat behind the goal, And after that you fuss and sweat To even reach the bowl.

I'd rather see a third-rate show— This football makes me sick— What's that—two tickets—you can't go?

Say—let me have 'em, quick. —Yale Record.

Love Me, Love Me Not "Do you really love me?" "Yes."

"How much?" "Well, here's my check book. You can look over the stubs."—Texas Ranger.

**Love's Labor**  
The hand that rocks the cradle today is a hired hand.—Judge.

**To Identify Genuine Aspirin**

**T**HE increasing use of Bayer Aspirin every year is proof that it has no ill effects. It is the accepted antidote for pain. It always helps; it never harms. Quick relief when you've a headache, or cold; or are suffering from neuralgia or neuritis. Rheumatic pains yield, too, if you'll only give these tablets a chance. But you want genuine Aspirin, so look for the Bayer Cross on every tablet. The box always bears the name Bayer and the word *genuine* printed in red.

Aspirin is the trade mark of Bayer Manufacture of Monocroticacidester of Salicylicacid

Advertising in the paper that is read by the farmers helps the merchant by bringing him their trade.

**Building Out-of-town Trade for Merchants**

"Burt, Mrs. Kellogg was in the store today. She lives fifteen miles out of town, but she comes in regularly fifteen miles out of town, but she comes in regularly the ads in The Chatham Record religiously. And she is just one of many that drive in to town to shop as a result of reading the ads."

"Yes, the ads certainly help to build out-of-town trade. The local ads are attractive, too. The Chatham Record buys an up-to-date cut and ad service that enables space-buyers in the paper to show well-drawn illustrations of their goods, just as the merchants in the largest cities do."

"I asked Mrs. Kellogg why she happened to take the paper so far from town. She said her family couldn't do without it."

"Well, the farmers in this section are growing prosperous. They have more money to spend for clothes, furniture, autos, radios and many other things."

"And in The Chatham Record they can find ads that tell them where to spend their money for necessities and luxuries with greater savings to themselves—and benefit to the merchants and to local business—right here in town."
