The desire to grab all with in reach is illustrated by the demand of three attorneys for \$25,000 each as additional fees for throwing the tobacco marketing association into the hands of receivers. But we believe it will be a long time before Judge Meekins permits any such robbery.

If all the tobacco farmers had joined the former co-operative association and proven loyal to it, despite its initial errors, they would have profited hitherto and would be in position now to secure the government funds provided for cooperative associations. There is hardly any doubt that a new organization will be formed. In that case, all tobacco farmers should join, and care should be taken in the beginning to avoid the errors of the former organization.

Provision should be made of men from the class. As a for a thirteenth juror in case teacher for many years, we of illness or misfortune to any have felt the resistance, and of the twelve in a prolonged have more than once unpopucase. Such provision, as is larized ourself in the commumade in some of the states, nity by giving grades in accord would have saved the State with the actual work done and several thousand dollars in greatly in contrast with grades the Gastonia case, where one formerly received for probaof the jurors became insane, bly less work. and the case had to be discontinued and set for a new begin- as a fact, that many of the ning after two weeks given high school classes in the State to it.

New Haven, Conn., Sept. 4 .---"Evidence is accumulating annually showing that the low achievements of Southern school children, when measured on standard tests of knowledge, skill, and intelligence, are due to inadequate educational opportunities in much larger measure than to lack of native intelligence," declared Dr. M. R. Trabue, director of the bureau of educational research of the University of North Carolina in an address today before the ninth International Congress on Psychology, which is being held this week at Yale University.

"High school seniors in North Carolina can not write an English composition which will measure up in quality to the average composition written by high school freshmen in New York, New Jersey and other Northern States. The average high school freshman in the South can not read as rapidly and as accurately as the average pupil two years before entering high school in the average school of the United States, and when measured on the most objective of the so-called intelligence tests our Southern high school pupils on the average show abilities that are typical of pupils in the north two or three years younger than they. But the cause is not poor inherited abilities. As soon as a Southern community offers its children an adequate amount of educational opportunities the achievements of these pupils begin to approach national standards. If the political leaders of the South ever allow their schools to have as much money per pupil as the schools of the nation, the aver-age achievements of Southern children will equal those of children the same age

IT ALL DEPENDS

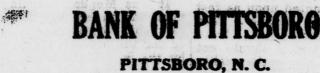

"It is impossible for me to save any money on my present income." No doubt you have often heard such a remark. Is it true?

Well, it all depends. Most people could save SOME. THING, be it ever so small, if they would give up some of the things they lead themselves to think necessary. The trouble is, they often refuse to deny themselves. They are not willing to pay the price NOW. But most fo them pay LATER, when they can ill afford to do so.

HIT THE BALL HARD --- if you would win the game

And so it is in the game of life-we must hit the ball hard every working day-to win. Even then you are not winning the game if you are not saving a part of your earnings. You must lay aside a certain sum for a rainy day to win in the end. A savings account is the easiest way of building this fund. Come in today and discuss this very important matter with us-no obligation.
