over 7 million jars used yearly

MILLIONS more each year follow the trend of modern medicine, and treat colds without "dosing."

Twenty-five years ago Vicks originated the modern external method of treating colds. Today, Vicks is sold in more than 60 countries, and over 26 million jars are used yearly in the United States alone.

TOWN AND COUNTY BRIEFS

Daniel L. Bell, Jr., arrived to take up his abode with the Bell family Sunday morning. Mr. and Mrs. A. H. London and Mr. and Mrs. R. G. Shannonhouse attended the funeral of E. K. Powe at Durham Sunday. Mr. Eugene Robinson leaves today for Valparaiso, Ind., to attend school. The Record wishes him a pleasant and successful session. Mr. and Mrs. George Chapin, of Bainbridge, Ga., came last week to visit the former's mother, brother, and sister for the first time in six years. Mrs. Jones, who lives with her nieces, Miss Pauline and Emily Taylor, is still very ill. She has had a nurse with her since her return from a Raleigh sanatorium. Mr. and Mrs. McGee have moved into the residence vacated by the Hunts when they moved into their new home. Mr. and Mrs. H. D. Gunter, who occupied part of the same residence, have domiciled themselves at the Blair Hotel. Miss Madge Marley of Greensboro, but formerly of Siler City, will be married to Mr. Herman F. Curtis of Rochester, N. Y., October 9. A number of social honors have been paid the bride-elect in Siler City the past few days. Mr. Del Preston Jones of Siler City married Miss Jane Catherine Farmer in DeSoto City, Fla., Monday of last week. They will reside in Siler City, where Mr. Jones is connected with the Standard School Equipment Company. Mr. Cal Desern and daughter, Miss Pearl, accompanied by Mrs. Sullivan, another daughter, from Raleigh, went down to Washington Sunday to visit Mrs. Sullivan's husband, who is in the hospital there, where he had undergone operations for appendicitis and gall stone. Little Misses Flora Creech Norris and Elizabeth Edmunds Norris of Raleigh are spending awhile at the home of their great grandmother, Mrs. Robert M. Burns. Their mother Mrs. Herbert Norris, Jr., who accompanied them here, spent a week-end with Mrs. Burns and Mrs. Herbert Norris, Sr.

BACK FROM CANADA Messrs. A. M. Riddle and Henry R. Riggan returned Sunday from Ontario Province, where they went to find employment in the new bright tobacco areas. Mr. Riggan, who is an experienced curer of the weed, got good wages. Mr. Riddle did not cure tobacco but found other ways of selling his knowledge of the staple. Mr. Riddle reports an increasing production of tobacco in Ontario, and says that the soil is remarkably adapted to the production of a fine bright tobacco. There are immense fields of it. One farmer had 1300 acres, but lost 300 acres by the frost of September 18th. He says the soil has the color and almost the fineness of snuff, and that there is little danger of the burning of even the lower leaves in that climate. The tobacco is packed in boxes for direct shipment to England, and the prices are good. Our Chatham wanderers found other North Carolinians, also Virginians, up there, either as superintendents or growers. He noted a novel method of fencing. The fences are built of white pine stumps with the horizontal roots cut from one side and left on the other. The stump is laid down on the trimmed side, with the roots on the other side sticking up.

Kill Peach Tree Borers The article on killing peach tree borers by E. B. Morrow, which appeared in the October 1, 1929, issue of The Southern Planter, should be of interest to everyone growing peach trees. In this article Mr. Morrow states: "Kill the peach tree borers by applying a dose of paradichlorobenzene. This chemical has a long name, but it does the work much more effectively than a man can do it with a knife and wire. It gives off a vapor heavier than air which is

poisonous to insects but not to man and animals. "Use three-quarters of an ounce per tree on trunks four and five years old and one ounce on trees six years and above. Injury may occur to the bark and trunk if used on trees under four years of age. On trees under four years of age the borers should be dug out with a knife and wire. In most parts of the South the material should be applied during the last days of September or the first week in October. Remove all grass and trash and level the soil around the base of the tree. Then apply the material about one and one-half inches from the trunk in a continuous band about one and one-half inches wide. If the crystals are allowed to touch the tree, injury may occur to the bark and trunk. Cover the material with several shovels full of soil, mounding the soil up around the tree trunk. "To avoid any possible of the paradichlorobenzene injuring the trees, tear down the mounds five or six weeks after making the application."

Cardinal Hlond, primate of Poland, who recently made an airplane flight from Warsaw to Rome, said: "It seems like a miracle."

When Babies CRY Babies will cry, often for no apparent reason. You may not know what's wrong, but you can always give Castoria. This soon has your little one comforted; if not, you should call a doctor. Don't experiment with medicines of adults! Most of those little upsets are soon soothed away by a little of this pleasant-tasting, gentle-acting children's remedy that children like. It may be the stomach, or may be the little bowels; or in the case of older children, a sluggish, constipated condition. Castoria is still the thing to give. It is almost certain to clear up any minor ailment, and could by no possibility do the youngest child the slightest harm. So it's the first thing to think of when a child has a coated tongue; won't play, can't sleep, is fretful or out of sorts. Get the genuine; it always has Chas. H. Fletcher's signature on the package.
