

POLITICAL ANNOUNCEMENTS

FOR COMMISSIONER

I hereby announce myself as a candidate for County Commissioner subject to the wishes of the Democratic primary to be held in June.
E. E. WALDDEN.

FOR THE SENATE

I hereby announce myself a candidate for the State Senate, subject to the action of the Democratic primary to be held in June.
W. P. HORTON.

FOR THE HOUSE

I hereby announce myself a candidate for Representative from Chatham County in the next General Assembly, subject to the action of the Democratic primary.
V. R. JOHNSON.

FOR THE HOUSE

I announce myself a candidate for the House of Representatives, subject to the action of the Democratic primary to be held in June.
S. WILL HARRINGTON.

FOR COUNTY COMMISSIONER

I announce my candidacy as a candidate for county commissioner to succeed myself. This announcement is subject to the action of the Democratic primary to be held in June.
R. J. JOHNSON.

FOR REGISTER OF DEEDS

I hereby announce myself a candidate for the office of Register of Deeds of Chatham County, subject to the action of the Democratic primary to be held in June.
J. WADE SILER

FOR COUNTY COMMISSIONER

I hereby announce myself as a candidate for County Commissioner, subject to the action of the Democratic primary to be held in June.
L. B. HESTER.

FOR THE SENATE

At the solicitation of a number of my friends, I hereby announce myself a candidate for the State Senate, subject to the Democratic primary to be held in June.
W. H. GARNER.

FOR CLERK OF COURT

I hereby announce myself a candidate to succeed myself as Clerk of the Superior Court. This announcement is subject to the action of the Democratic primary of June 7th.
E. B. HATCH.

COMMENDS WALDEN

Editor Chatham Record: I notice that Mr. E. E. Walden of Moncure, has announced himself for county commissioner for Chatham County, subject to Democratic primary. I have known Mr. Walden for many years. He is well known in this county, as well as adjoining counties.

Mr. Walden is a successful business man of high ideal, has made many friends in his business career, believes in giving all alike a square deal, with partiality to none.

Mr. Walden is no politician, but a man who is interested in his county affairs, and a man whose capacitated ability affords him of fitness for the trust which he seeks.

A. M. COTTEN,
Merry Oaks, N. C.

Another good place for a zipper would be on string beans.—Life.

DOCTORS quite approve the quick comfort of Bayer Aspirin. These perfectly harmless tablets ease an aching head without penalty. Their increasing use year after year is proof that they do help and can't harm. Take them for any ache; to avoid the pain peculiar to women; many have found them marvelous at such times. The proven directions with every package of Bayer Aspirin tell how to treat colds, sore throat, neuralgia, neuritis, etc. All druggists.

ASPIRIN
Aspirin is the trade mark of Bayer Manufacture of Monocaceticacid of Salicylicacid

Cotton Growing Facts Given In Circular

Because the market outlook for cotton is so poor this year, growers will need to produce the crop economically and to make the best possible yields on a smaller acreage. To aid in this, the North Carolina Experiment Station at State College has published agronomy information circular number 46 by P. H. Kime, cotton expert, giving some of the important factors to be considered in growing the crop this year. With cotton at 16 cents a pound and little likelihood that it will sell for more, the grower must do everything he can to keep the cost of production under 16 cents. This means a decreased acreage, using the best cotton lands and increasing the average yield an acre. Producing eight bales on ten acres will be more profitable than producing ten bales on 20 acres.

Sandy loams and clay loams are the best cotton soils, says Mr. Kime. They warm up earlier in the spring than the clay soils or those which are poorly drained. Earliness is an important factor under boll weevil conditions on land that will produce only one-half a bale an acre under normal conditions. Thorough preparation of the soil is essential, says Mr. Kime. A slight ridge to the seed bed gives better drainage and causes it to warm up more quickly. The seed will thus germinate more quickly than when planted on a level.

Do not place the seed in direct contact with the fertilizer. It is best to mix the plant food with the soil at least a week or ten days before planting. Close spacing and frequent cultivation are two other points recommended in the circular. Mr. Kime offers to send it free to any cotton grower wanting the information.

New Delivery Model

In order to meet the requirements of its expanding commercial car business, the Chevrolet Motor Company today announces a roadster delivery model to supplement its present commercial car line. The new product is now in production and deliveries to dealers have been under way for several days.

Designed to satisfy the needs of every variety of pick-up work, the roadster delivery makes an added form of transportation available to the users of commercial cars and provides some features new to this field.

Powered by the six cylinder valve-in-head Chevrolet engine, the roadster delivery has all the advantages of Chevrolet passenger car comfort, economy and dependability, according to officials. It has internal-expanding brakes on all four wheels; an easy ball bearing steering mechanism and a bigger, sturdier rear axle.

Extra large carrying capacity has been provided through the use of the full length channel steel frame and four unusually long semi-elliptic springs. It allows for the use of a 66in-ch loading space, without excessive overhang. It is a full 45 inches wide, fourteen inches high and 24 cubic feet in capacity.

From a convenience standpoint, the roadster delivery, offers exceptionally wide doors, equipped with snugly fitting side curtains, that open and close with the doors as single units.

A wide selection of steel slip-on boxes has been provided to meet the varying requirements of pick-up service.

FEED COD LIVER OIL TO CHICKS

Raising chicks out of season up to a few years ago was practically impossible. The chicks would develop rickets—probably more commonly known as leg weakness—at the age of four to eight weeks, due to faulty mineral nutrition. As the name implies, the chicks become weak in the legs, which may be noted by an unsteadiness of gait, and upon picking up such a chick the bones will be found very weak, soft, and crooked. The chicks affected are droopy and listless, the wings drag, and, for the most part, the chicks squat. The largest and most vigorous chicks are often those first to show the symptoms.

Not until the discovery of the relation of direct sunlight to the growth of chicks were poultrymen able to raise early hatches. Even then the problem of preventing rickets with chicks that had to be kept confined the first eight to ten weeks was not solved. Ordinary window glass was found to filter out the valuable rays of the sun. In other words, a well lighted brooder house, where the light passes through glass, is about as effective as an underground cellar so far as its ability to aid mineral nutrition. Besides, as you know, many of our early spring days are not brightened by the direct rays of the sun.

Science in its search for something which they could add to the chick's ration to take the place of sunlight, in so far as proper mineral nutrition was concerned, found that stored away in the livers of the codfish was sunshine. Cod liver oil or cod liver meal added to a chick starter will insure full mineral nutrition.

Cod Liver Meal in addition to its antirachitic properties supplies liver tissue which is a blood builder. Good blood means better health, more complete digestion, and greater resistance to diseases.

Seeds and seedlings are just like people—they like a smooth and well-made bed.

Hens Pay Well For Feed Eaten

Hens in 133 farm flocks, totaling 26,231 birds paid a little more for the month of January according to 22 cents above feed costs than to reports of these flocks made by the owners to C. F. Parrish, poultry extension specialist at State College. "These demonstration flocks were located in 36 counties," says Mr. Parrish. "The report for January shows that each hen produced about 12 eggs for the month or a total of 308,878 eggs. The eggs sold for \$11,537.43 or an average of 44 cents a dozen. The highest price during the month was 65 cents and the lowest, 30 cents a dozen. The average price was nearly five cents more a dozen than for the same month in 1929."

Mr. Parrish says each bird in the 133 flocks consumed 3.30 pounds of scratch feed and 3.66 pounds of grain each during the month. It took 7.13 pounds of feed to produce one dozen eggs. The total value of the eggs produced by the 26,231 hens amounted to \$41,537.43 for the month or an average of nearly 44 cents a hen. With an average feed cost of 21 cents a hen, the birds returned a profit above feed cost of more than 22 cents each for the month or a total profit of \$5,968.55 for all the hens in the flock.

The value of good housing, proper management and the feeding of an egg-producing ration to the farm flock is beginning to be realized by the poultrymen of North Carolina, says Mr. Parrish. The hen is no longer kept as a scavenger on the farm but now plays an important part in the annual income. With better breeding stock and better methods of housing and feeding generally followed, she is destined to become of greater importance in the future, he declares.

Sow Red Clover; Seed Are Cheap

The present low price of red clover seed should be an incentive to the farmers of the piedmont section of North Carolina to sow more of this wonderful legume than ever before, declares E. C. Blair, extension agronomist of the agricultural extension service at State College.

At the present says Mr. Blair, red clover seed are cheaper than they have been at any time since the World War, and the very best grade of American grown seed can now be bought for less than the best European seed cost a few years ago.

Mr. Blair does not urge the use of red clover to the discontinuance of the other legumes, for other varieties are excellent for various purposes, but none of them, he declares, can take the place of red clover on the red clay soils which are found in many sections of Piedmont North Carolina.

On these red clay soils of the piedmont section of this State, red clover makes very big yields of hay and on top of that a big growth to turn under in the fall to improve the soil for next year's crop of corn or cotton.

The best method of seeding red clover is to drill five to seven pounds per acre lightly over small grain, along with 100 to 200 pounds of acid phosphate or other fertilizer. The clover seed may be mixed with the fertilizer before drilling or put in the small clover box with which many of the drills are equipped. The best time to sow the seed is usually the last few days of March.

There is no need to worry about inoculation for red clover, but it requires a fairly sweet soil. The rule is to apply one ton of ground limestone per acre for this crop, suggests Mr. Blair.

STONEWALL JACKSON FIELDS

Stonewall Jackson Fields, son of the late James ("Shoemaker") and 2, 1961, and died at his home on Mrs. Mary Fields, was born May Cummock Rt. 1, Thursday, March 13th, following an extended illness of about a year.

In young manhood, he married Miss Emma Glosson, a daughter of the late William and Mrs. Adline Glosson, who with the following children survive him: Claude, address unknown; Mrs. J. H. (Nora) Waddell of Jonesboro; Mrs. T. S. Griffen (Ollie), of Bear Creek Rt. 2; Miss Russie Fields, Lucian and Herbert Fields, who lived with parents. He is also survived by four brothers, Dr. R. M. Fields, of Goldston; "Buck" Fields of Florida; L. M. Fields, of Siler City and W. W. Fields of Goldston. One sister, Mrs. J. D. Norwood, of Durham and a half sister, Miss Jennie Fields of Siler City.

In early life he joined Sandy Branch Baptist church and remained a faithful member of same until a few years ago, when he moved his membership to the newly organized Carolina Baptist church, where he remained until his death.

The funeral services were held from Sandy Branch Baptist church Friday afternoon being conducted by Rev. A. H. Porter, of Bonlee. The Goldston Council 288 Jr. O. U. A. M., of which he was a faithful member had charge of the funeral service. The interment was made in the church cemetery.

A good man has gone who will be sadly missed. May God comfort the sorrowing loved ones.

Mrs. Alice Draper, 83, of Lake Blue, Ill., has read the Bible completely through sixty-one times, and now is engaged in her sixty-second reading.

JACKSON DAY DINNER

STARTS ON PAGE ONE

paid the same tribute to Senator Simmons and was greeted with a smatter of handclapping that was instantly drowned in a chorus of boos and hisses.

Mr. Taylor then recognized Homer C. Lyon who had a message to read from Senator Simmons. As soon as he had read the opening sentence bedlam broke loose and it required all of the efforts of Mr. Taylor, Mr. Bailey and others on the platform, assisted by several hundred throughout the audience, to get enough quiet restored to permit reading of the message. At its conclusion one man near the back of the auditorium leaped to his feet and after vainly trying to gain recognition from Mr. Taylor, yelled at the top of his voice, "Mr. Chairman's that's a hell of an excuse."

Josiah William Bailey was presented by J. M. Glenn of Gatesville. Mr. Bailey made no reference to his own campaign or to the June primary, but bade Mr. Shouse to take back to Democratic brothers and sisters throughout the nation the assurance that North Carolina is coming back into the Democratic fold, state and national. He promised an old time 100,000 majority for the Democratic ticket next November, and a full congressional delegation of 100 per cent pure Democrats.

It was a Bailey meeting. The Raleigh man had to lose two or three minutes of his speaking time to let the ovation for him run its course. And when his time was up the audience called for more so insistently that Toastmaster Taylor yielded one minute additional.

The speeches were broadcast over radio station WPTF. A series of amplifiers about the auditorium enabled every person there to hear distinctly. Represented in that audience were the leaders and workers in the Democratic party in North Carolina. They were not all young; but most of them were young in spirit and almost bellicose. Some of the old warhorses were on the platform and among the diners; there were enough women to add color and charm; but most of the diners were under forty years old, and were "rain" to go in a good old time Democratic fight.

Enjoyable as was the dinner and the speeches, really the most pleasant feature of the day was the informal get-together of Democrats in the Sir Walter hotel lobby. At one time more than a majority of the Democratic members of the legislature could be seen at one glance. Five of the eight Democratic congressmen were there, and half a dozen candidates for their seats in the several districts.

At Bailey headquarters it was learned that Bailey claims to the first, second, fourth and tenth congressional districts were unchallenged by the Simmons leaders. The third, sixth and seventh are recognized as debatable ground; at least both candidates claim them. The fifth, eighth and ninth districts are claimed by Simmons managers, but their claim is disputed by field men for Bailey. Whatever the results in June may be, it can be stated emphatically now that there is an overwhelming majority of expressed sentiment in favor of the Raleigh man.

Both Sides of the Proposition

DOWN in the Black Patch along the line between west Kentucky and west Tennessee where the heavy dark tobaccos are grown, a prominent planter grew dissatisfied with the marketing arrangements. It seemed to him he was not getting a fair deal from some of the large European buyers and from the American shippers who acted as the middlemen. He decided to make a private inquiry as to conditions.

For his emissary in this matter he chose his overseer or crop-manager. The latter was an expert in making the earth yield of its bounty and regarding the curing and packing of the weed he had no superior in the South. But he had never been farther away from home than Louisville and had never seen a larger city than Louisville. Trusting, however, to the man's native shrewdness the planter put him on the train with instructions to go to New York, conduct a personal investigation and report back by telegraph.

Upon his arrival the visitor went direct to one of the larger docks on the North river where several ships were being loaded with the product of the Black Patch for shipment abroad. Next he visited a warehouse where tobacco for domestic consumption was stored and immediately sent his principal this telegram:

"Better sell this year's crop for any price you can get. I've done seen more tobacco already than the whole world can use in the next twelve months."

After this he took a stroll uptown. When he reached Broadway and Fort street he hunted up another telegraph office and wired his employer as follows:

"Disregard first message. Hold all the tobacco you've got. There's enough folks in this town alone to chew it all up inside of the next twenty-four hours."

DON'T STINT

Every man wants a Bank Account, but STINTING one's self of food and other things essential to the highest degree of efficiency is not the way to get it. The secret is to Make MORE.

Any Chatham county farmer, with a fair season, should produce everything needed for food and feed except sugar and coffee and the condiments, such as salt, pepper, and flavoring extracts. When he has done that, he can live like a king and will need comparatively few dollars for other living expenses.

When he gets a dollar then, there will be some chance of his putting it in the Bank.
