New Methods Adopted In Chilean Industry

Production of Nitrate Fertilizer in Sun-Parched Desert Is Speeded Up.

AMERICAN engineers are helping to revolutionize an industry up in the sun-parched mountains of northern Chile.

The application of modern methods of mass production is making the Chilean nitrate industry a model of 20th century efficiency, according to Conrado Rios Gallardo, former Chilean Secretary of State, who was a recent visitor to the United States before becoming his country's ambassador to Peru.

With the elimination of waste and the use of labor-saving machinery, a marked decrease, he said, has been made in the cost of producing the fertilizer under the difficult conditions found in the arid desert.

"Never before has the nitrate industry occupied as strong a position as it does today," declared Ambassador Gallardo. "Not only have the mechanical processes been vastly improved, but the production has been stabilized to the benefit of both the producers and the consumers of this fertilizer."

The Chilean Government has taken an energetic part in the improvement of the industry. It has aided the producers through legislative enactment

and has encouraged new American processes for mining and refining the fertilizer.

At present nearly one-half of the total capital invested in the industry is owned in the United States, pointed

CONRADO RIOS GALLARDO

out the Ambassador. American farmers are also the largest users of Chilean nitrate, their consumption during the past five years averaging about 1,000,000 tons annually.

The nitrate fertilizer was first shipped to this country in 1830. It has been used ever since, and today it occupies the honor of being the oldest of the commercial fertilizers.

whispering tenderly, "Wake up, wake up, little seed; come up into the beautiful world and just see!" Bye and Bye the little seed wakes slowly, sends the tender plant pushing up through the warm soil, until at last it looks out upon the great, beautiful sky and sunlit world. It was not done by howling winds, nor by floods of icy water ploughing the seed and washing it away, but nature just loved the dry seed into life and growth! And just so the dear God, who ever gives and who is himself Love, is ceaselessly seeking of humanity, and to love it up into light and life, and responsive loving. Through the ages this has been God's way of approach unto mankind; and this is the way he woos each individual soul.

His Holy Spirit comes softly down into the dark, and caressing the soul which seems dry and dead he calls gently, tenderly, "Wake up, wake up, soul! Come up into life, and your farm has taught you how nature gives and nature loves; just so, God gives and God loves.

"Tis heaven alone that is given away; 'Tis only God may be had for the asking."

Then the farm preaches a thrilling solemn sermon concerning Fruit Bearing!

It preaches to man the inescapable duty of fruitfulness. When the Master came seeking fruit on the tree and found none, he spoke doom. Look you at the field on which you have toiled, giving it the best of seed, fertilization and culture: what if it just sourly refuses to respond? Now hear these words from Holy Writ: "Ground that drinks in frequent showers and produces vegetation that is of no use to those for whom it is cultivated receives God's blessings. But if it yields thorns and thistles, it is thought worthless and almost cursed, and it will finally be burned". Did any preacher ever proclaim to you a more solemn message than this the farm preaches in its sermon?

It preaches also to man the inexorable law of fruit after its kind. "Whatever a man soweth, that shall he also reap"—in a barley field or in a life. Flesh sowing and spirit sowing each yields its appropriate harvest. Unwavering the farm bears witness to God's solemn warnings. Eternity itself, the farm whispers it, but irrevocable reaping of earth's life sowing. Fruit-bearing must ever be according to the divine law, after its kind.

And then the last and greatest of the farm's sermons is a sermon of God!

The man who lives near to nature's heart should live near to God and his Angels. I can understand how dwellers in the city slums, and in the accursed slavery of tenement sweat shops, may be sceptics, atheists; but how can the farmer fail to find God? It is not toil, but sin, that separates from him, and the toiler in the field, great blue sky above him, heaven-sent sunlight flooding over him, may and commune with God everywhere. "Blessed are the pure in heart, for they shall see God", the Master said; and he meant it not alone up yonder "When the mists have rolled in splendor from the strong eternal hills", but that they shall see him here and now, at work in all his artistry of beauty, in all his handiwork of skill.

Now friends, come with me out in the wide, open farm, stand in silence, and consider the sermon the farm preaches: Beauty, Work, Loving and Giving, Fruit bearing and God, these are readily seen on every farm, and the vision will lift you to a higher plain of living.

Pass not nature's pulpit, listen tentatively to its preaching, there is a message and lesson in all outdoors.

Come, I am going your way, so let us go hand in hand. You help me and I'll help you enjoy the beauties of God's gardens.

We shall not be here very long, for soon Death, the kind old nurse, will come and rock us all to sleep.

5th Sunday Meeting

Union Meeting to be held at Hickory Mountain Baptist church June 28-29, beginning the 5th Sunday and day before.

SATURDAY

- 10:30 a. m. Devotional by Rev. B. L. Gupton.
- 11:00 a. m. Sermon by Rev. R. H. Weaver.
- 12:00 noon Organization.
- 12:30 p. m. Intermission until 2:00 p. m.
- 2:00 p. m. Devotional by Rev. E. W. Byerly.
- 2:15 p. m. How to secure and Maintain purity of church life—by Rev. J. C. Canipe and others.
- 2:45 p. m. What are the pressing needs of the Sandy Creek Association—by Rev. F. C. Hawkins and others.
- 3:15 p. m. Why-should and how can every christian be a missionary—by Rev. O. A. Keller and others.
- 3:45 p. m. Business conference.

SUNDAY

- 10:00 a. m. Devotional—by Rev. R. R. Gordon.
 - 11:00 a. m. Sermon by Rev. J. L. Martin.
 - 12:00 Intermission until 1:30.
 - 1:30 p. m. Song and Testimonial service conducted by the moderator.
- All the churches in the Sandy Creek Association the cordially invited to be represented and all the pastors are invited to be present.
- A. H. Porter
J. C. Canipe
E. W. Byerly

NOTICE OF SALE OF LAND

Under and by virtue of power of sale contained in a certain deed of trust executed by W. S. Duffee (unmarried) and J. Q. Seawell and wife, Alma Seawell, to Robert Moseley, trustee, dated April 1, 1929, and recorded in Book No. GU, at pages 123-124, in the office of the Register of Deeds of Chatham County, North Carolina, default having been made in the payment of the indebtedness thereby secured, and demand having been made for sale, the undersigned trustee will sell at public auction to the highest bidder for cash at the county court house door in Pittsboro, North Carolina, at 12:00 O'CLOCK NOON ON WEDNESDAY, THE 9TH DAY OF JULY, 1930,

the following described property located in the County of Chatham, Matthews Township, North Carolina:

Lots Nos. '29, 30, 31, 32, 33, 34, 35, 36, 37, 38 and 39 as shown on a plot of High School Place recorded in Plot Book G. K, page 356, in the office of the register of deeds of Chatham County, North Carolina.

This the 3rd day of June, 1930.
ROBERT MOSELEY,
Trustee.

June 12 to July 3

An Unpleasant Subject

All of the functions of life are not pleasant to consider. Perhaps this is why some mothers refuse to think that such symptoms as restless sleep, loss of flesh, lack of appetite or itching nose and fingers in their children, can be caused by round or pin worms. Many mothers have proven, however, that a few doses of White's Cream Vermifuge, that sure and harmless worm expellant, will make these symptoms disappear. You can get White's Cream Vermifuge for 35 cents per bottle from Pittsboro Drug Co. Adv.

You should not encourage vain hopes in a helpless dependent, nor give place to a powerful man.—Hindoo proverb.

If the triangles made a god they would give him three sides.—French proverb.

SHELL GAS BEATS 'EM ALL

Come to Jim's Service Station and get it at 22 cents a Gallon. The proof of the pudding is the eating; likewise a test will prove Shell best.

At Moncure and Sanford fok just out of Pittsboro.

SERVING MANY BUSINESSES

Experience of large fleet owners reveals the unusual reliability and economy of the new Ford

A SIGNIFICANT TRIBUTE to the value of the new Ford is found in its increasing use by Federal, state and city governments and by large industrial companies which keep careful day-by-day cost records. In most instances, the Ford has been chosen only after exhaustive tests of every factor that contributes to good performance—speed, power, safety, comfort, low cost of operation and up-keep, reliability and long life.

unusual accuracy in manufacturing. Beneath its graceful lines and beautiful colors there is a high degree of mechanical excellence.

An example of the value built into the Ford is the use of more than twenty ball and roller bearings. They are hidden within the car and you may never see them. Yet they play an important part in satisfactory, economical performance. Their function is similar to the jewels of a fine watch.

Prominent among the companies using the Ford are the Associated Companies of the Bell System, Armour and Company, The Borden Company, Continental Baking Corporation, Firestone Tire and Rubber Company, General Electric Company, Goodyear Tire and Rubber Company, Kellogg Company, Knickerbocker Ice Company, Morton Salt Company, Pillsbury Flour Mills Company, The Procter and Gamble Company, and Swift & Company.

Throughout the Ford chassis, a ball or roller bearing is used at every place where it is needed to reduce friction and wear and give smooth, reliable mechanical operation.

At many points, as on the transmission counter-shaft, clutch release, fan and pump shaft, and front drive shaft, these ball and roller bearings are used where less costly types of bearings might be considered adequate.

Each of these companies uses a large number of Ford cars and trucks. The Associated Companies of the Bell System use more than eight thousand.

Additional instances of the high quality built into the Ford are the extensive use of steel forgings, fully enclosed four-wheel brakes, Rustless Steel, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, torque-tube drive, three-quarter floating rear axle, and the Triplex shatter-proof glass windshield.

Modern business moves at a fast pace and it needs the Ford. Daily, in countless ways and places, it helps to speed the production and delivery of the world's goods and extend the useful service of men and companies.

The Ford policy has always been to use the best possible material for each part and then, through large production, give it to the public at low cost.

Constant, steady operation over many thousands of miles emphasizes the advantages of the sound design of the Ford car, its high quality of materials, and

AN OLD STORY

It's an old story but worth repeating, that we all seem to have little regard for nickles, dimes, quarters, even dollars.

Yes, they DO slip away so easily, and with them go our chances for acquiring a competence. Most of us are very careful in the expenditure of LARGE sums of money, yet seem careless of the fact that DIMES make DOLLARS. So—first:form a saving habit early in life. Second: Deposit your savings in a good, reliable Bank—like ours.
