A SIMPLE FORMULA

Achieving financial success can be reduced to one simple formula: Replace business income with investment income—as quickly as possible.

You may not be doing that, but other people are. Did you know that the total wealth of the United States climbed from 65 billions in 1890, to over 400 billions in 1926? Our national income is now nearly \$95,000,000,000 annually, an increase from 4 billions in 1920 to 53 billions in 1926. Think that over. Our advice has helped others. May we help you?
