Heat Wave Toll In U. S. Hits 180

No relief from the heat in sight.

That was the Weather Bureau's disappointing offering today to a scorching nation.

Scattered showers brought a temporary respite to some sections. But with them came increased humidity and greater oppression. Weather conditions in Central Canada, where real relief was expected to develop, gave forecasters no basis for any optimistic predictions for today or tomorrow.

The U. S. Weather Bureau at Chicago reported that the protracted hot spell, now a week old for some wilted regions, probably would continue for at least three days more.

Virtually all the nation east of the Rockies suffered from the sizzling heat. Temperatures of 100 or higher were reported yesterday from such scattered points as Montana, Minnesota and Arizona.

180 Deaths

At least 180 deaths were attributed, directly or indirectly, to the torrid weather. Thirty-eight persons in 12 States were listed as heat victims. In 31 States there were 152 drowning victims among the millions who sought relief at the beaches.

A. E. Anderson, State-Federal agricultural statistician at Omaha, Neb., said the heat wave was creating a serious crop situation in that region. He reported that even sudan, a drought resisting sorghum, was beginning to suffer.

High winds and hail damaged crops and caused other property losses in Massachusetts, Maine, New Hampshire and Connecticut. Hail damage to Connecticut river valley tobacco crops was estimated at \$150,000 to \$300,000.

Dr. Poe Endorsed For Appointment To Cabinet Post

Raleigh.—North Carolina farm leaders have endorsed Dr. Clarence Poe of Raleigh for appointment as secretary of agriculture, to succeed Henry A. Wallace, Democratic vice presidential nominee, but Dr. Poe himself declined to comment.

W. Kerr Scott, commissioner of agriculture, sent a telegram to President Roosevelt in which he said: "The South has been called economic problem. No. 1, and it is well to consider a man who knows the problems of the South in seeking a solution to the agricultural ills of southern farming."

The movement apparently was started by Harry B. Caldwell of Greensboro, master of the North Carolina Grange, who wired Mr. Roosevelt that the farmers of North Carolina and the South will heartily appreciate the appointment of Dr. Poe as secretary of agriculture, not only because he understands their problems, but because his life has been devoted to the best interests of agriculture both in his home state and throughout the nation.

Attempt Made To Hinder Red Cross In Raising Funds

Hyde Park, N. Y.—President Roosevelt charged yesterday that a fifth column is attempting to sabotage Red Cross efforts to raise funds to aid suffering Europeans.

At the same time he said that he was seeking verification of reports that Europe is facing the worst famine in history.

He disclosed at a press conference that the government has received reports—thus far unofficial—that Germany is forcing 50 per cent of its livestock and send the food to the Reich to replenish falling food supplies.

Sabotage efforts against the \$20,000,000 Red Cross drive, Mr. Roosevelt said, were reported to him by Norman H. Davis, chairman of the American Humanitarian organization. The efforts, he said, are based on a whispering campaign that supplies sent to suffering refugees in Europe are falling into the hands of German and Italian armies.

Speaking as ex-officio president of the American Red Cross, Mr. Roosevelt indignantly denied such reports.

Experts of the U. S. Department of Agriculture think that the war will result in a change in the breeds of livestock raised in Denmark, Holland and Belgium.

The United States is the only major agricultural country without a National agricultural museum, and there is agitation that such an institution be established.

Wild turkeys, which rank as big game in New Mexico today, were raised as domesticated fowl by the Pueblo Indians when the Spaniards arrived in the sixteenth century.
