This the 27th day of June 1941. C. C. HAYES, Clerk of Superior Court 7-17-4t (t)

By J. B. SNIPES (County Agent)

When one looks over the 470,000 acres composed of 775 square miles, with the population of 43,000 people—the picture indicates that Wilkes is an agricultural county. Then, when one studies this picture with the thought in mind, what is the soundest and most profitable thing for farmers? Our slogan "Lime Legume, and Livestock" seems to answer the question.

Due to the fact that Wilkes county is one of the largest counties in the State, most of the land is so steep and rolling—that it will be more profitable to put it into pasture or some close growing crop rather than putting it to row crops, it seems that livestock is most suited for the county. Then, with the thought in mind to succeed with livestock one must produce the large part of the feed for the livestock—is where our legumes come in. Realizing also that in order to make a success with livestock, markets must be available and we seem to be wonderfully blessed with the markets at the present time. Cattle Dairy company has a receiving station which is located in North Wilkesboro near the depot. This plant is at the present time receiving approximately 15,000 pounds of milk per day from their many routes throughout the county. This company pays \$1.88 per hundred pounds for 4 per cent milk and 3c a point for all above 4 per cent. At this rate, farmers can safely figure around \$100.00 per year from an average cow.

In addition to the Coble Plant, the Carnation Milk Company, which is located in Statesville, sends a truck in the southern section of the county and is, at the present time, getting several gallons per day. We have a few farmers who are making a success of dairying other than the many who are selling to the milk plants. These farmers are the ones who give more of their time and thought to dairying and are retailing milk.

We also have a butter plant owned by the Rosemary Creamery of Atlanta, Ga., which is established in North Wilkesboro near the depot, and they will be glad to buy up all of the butter that the farmers and merchants throughout the county have to sell. This affords the farmer another outlet for his dairy products. They are getting 10,000 pounds per week at the present.

In addition to the companies handling dairy products, we have a stock market here in Wilkesboro which buys all classes of livestock at an auction on Monday afternoon of each week. It seems, with the above mentioned markets, that the farmers are wonderfully blessed with any livestock or dairy products they might have to sell.

Now a word about our slogan "Lime-Legume-Livestock": One might ask the question—why Lime? In the first place most of our soil is acid and lime neutralizes the acidity of the soil. All of our legumes and grasses respond favorably to sweet soil and therefore make more abundant growth than they do in acid soils. By the farmers using more than 100 cars of lime per year, we are laying the foundation of our livestock production. After we get our soil sufficiently limed, the next thing is to prepare our land for more and better pastures for grazing and legumes for hay. If each farmer who has livestock will prepare a pasture on which to graze his cows six to eight months out of the year, and then produce enough legume hay to take care of them the remainder of the year, plus some for emergencies, such as the drought we have just experienced, he should surely realize some profit from his livestock.

Legumes which are suitable for hay are: Lespedeza, Alfalfa, Clovers, Soybeans, Cowpeas, Vetch, Austrian Winter Peas. He may also sow small grain and Italian Rye Grass for hay and temporary grazing. This brings us down to "Lime-Livestock". Each farmer should do everything possible to improve the breeding of his animals in order to get high producing animals which will mean more profit to him.

We can perhaps best improve our breeding by taking advantage of our artificial breeding program which is already established in the county. Then, if necessary, producing a few higher blooded males for future development. Whatever breed we select, whether it be Guernsey, Jersey, Holsteins, Ayrshire, Hereford, Aberdeen Angus, or any other that we might have, we should try to improve the quality of our animals all the while; realizing that it does not take any more feed for a good animal than it does a scrub. If the majority of our farmers in Wilkes county will put to prac-

Protecting Birthplace of Christ

View of the Church of the Nativity in Bethlehem, Palestine, showing how the war has transformed it into semblance of a fortress. The church is built over the site of the stable in which Christ, the Prince of Peace, is traditionally believed to have been born. This part of the Holy Land is now in the danger zone.

Young Men Will Meet Challenge

Declaring the people of the United States must become united in purpose and effort to successfully meet their common responsibilities for national defense, Brig. Gen. Lewis B. Hershey, Deputy Director of Selective Service, told the members of the United States Junior Chamber of Commerce that the men of their age group must bear the brunt of achieving that unity.

General Hershey addressed the annual convention of the Chamber in Minneapolis, Minn., on Friday morning, June 20.

"We must put our house in order," the General asserted. "The people of the United States will not tolerate indefinitely the unsocial behavior of those who are willing to seize upon the Nation's emergency as an occasion for the furtherance of personal advantage. It matters not whether it be plant owners, plantation owners' skilled men or common laborers. All have a part to play in our all out defense."

"The call to quarters has blown. Every station must be manned. There is a post of honor on sea, on land, and in the air. There is a post of honor in the factory and on the farm. All are posts of activity. All of us must work or serve. There is no place for the slacker or the shirker. They are hitchhikers on the backs of the soldier."

Emphasizing that the immediate need for National Defense is to produce rapidly and efficiently all the munitions needed by our defenders, General Hershey said:

"The production of these munitions requires the cooperative efforts of management, labor and the government. This is a national emergency and not a reason for debate, discussions, and delays. This is a time for action—a time for production—production—and more production."

"The soldier waives many of his ordinary privileges in the interest of the whole. No one believes an Army can exist if each member must be convinced of the wisdom of each single action. The citizens of this nation must achieve by voluntary means a similar singleness of purpose if the tremendous responsibilities of our civilian population are to be met. Liberty and license have been sadly confused in this country for many years, General Hershey declared in urging the immediate and important need for putting the nation's house in order."

"Profit grabbing and wage-grabbing are shortsighted and will be costly to the recipient in the end. The obligations of defense are making heavy demands upon management and labor. The government as the representative of the whole people has the right to demand that neither manabement nor labor slow down or cease its national defense efforts while grievances are adjusted. "A million and a half of our young men are now waiting for guns, for ships, for airplanes—

lice "Lime—Legume—Livestock," and realize just what this will mean to our soil income and health of their families. Wilkes county has the possibility of becoming one of the greatest livestock counties in the state. We should keep in mind, that by putting more land into pasture and legumes and using the manure from our animals, that we are going to conserve and enrich our soils from year to year. We should also realize that we are going to market our grasses and legumes by feeding it to livestock and in turn improve the health of our family by consuming more of these products and increasing our income by selling the surplus.

This 17th day of June, 1941. KYLE HAYES, Substitute Trustee 7-10-4t (t)

Auto Fatalities Higher This Year

Wilkes Has Increase Of One In Five Months; State Fatalities Up 147

Wilkes county reported four traffic fatalities during the first five months of this year, according to a five-months summary released this week by the Highway Safety Division.

This number represented an increase in comparison with the number killed in Wilkes county during the same period last year, when three persons were killed.

Traffic fatalities for the state as a whole totaled 448 persons for the five-months period, this grim toll running nearly 49 per cent ahead of the 301 persons killed in North Carolina the first five months of last year.

Eleven counties had 10 or more fatalities, these being Alamance, Buncombe, Columbus, Cumberland, Durham, Guilford, Halifax, Henderson, Mecklenburg, Rockingham and Wake. No fatalities were recorded in the following 14 counties: Alexander, Alleghany, Ashe, Avery, Camden, Cherokee, Clay, Dare, Haywood,

Hyde, Jones, Fors, Scotland and Yancey.

Substantial increases were noted in the area of defense activities, Onslow county showing 9 fatalities the first five months of this year against none for the same period last year, Cumberland showing 12 against 9, Columbus showing 13 against one, and New Hanover showing 7 against 4.

Fifty-five of the 100 counties in the state registered increases, 25 showed decreases, and 20 held on a par with last year.

"There has been a constant upward trend in traffic deaths in this state since last August, with the result that we are now running nearly 50 per cent above last year in the number of persons killed in street and highway accidents," stated Ronald H. Houtt, director of the Highway Safety Division.

"This trend can be stopped, and careless motorists and pedestrians must make up their minds that it shall be stopped. This carnage is unnecessary. And it is preventable. Let's stop it."

Tar Heel farmers last year produced 1,344,000 bushels of peaches and ranked 13th in the Nation, reports the State Department of Agriculture.

Questions

Question: What publications are available on poultry production?

Answer: The State College Extension Service has published the following poultry bulletins, any and all of which are available free upon request to the Agricultural Editor, N. C. State College, Raleigh: Circular No. 154, "Common Diseases of Poultry;" Circular No. 155, "Artificial Incubation and Brooding of Chickens;" Circular No. 156, "How to Cull Poultry Flocks;" Circular No. 158, "Feeding for Egg Production;" Circular No. 160, "Parasites of Poultry;" Circular No. 239, "Grazing Crops for Poultry;" Circular No. 244, "Poultry Breeding as a Means of Flock Improvement;" Circular No. 245, "Feed Formulas for Poultry;" and Circular No. 249, "Incubation."

North Carolina's cash income from livestock and livestock products sold in 1940 was only \$38,591,000 which ranked the State as 30th in cash income from livestock and livestock products, reports the State Department of Agriculture.
