Mrs. Fred Emerson Is Feted At Bridge Party

Mrs. Otis Keeling and Miss Nellie Outlaw entertained at a delightful bridge party at the home of Mrs. Keeling on Sixth Street Friday evening honoring Mrs. Fred Emerson, the former Miss Mamie McNeil, of this city. Three tables were made up for bridge, being arranged in a festive setting of cut flowers while attractive corsages marked the places of Mrs. Emerson and Mrs. Russell Gray. Mrs. Gray, a bride of the spring, was prior to her hospital Miss Annie Vannoy, of North Wilkesboro.

In the game of bridge Miss Lillian Stafford scored high and Mrs. Gray low, each receiving attractive awards. To both of the brides the hostesses presented a crystal in their chosen pattern. A dessert course followed play.

Mrs. F. C. Hubbard, Sr. Is Sewing Club Hostess

With Mrs. F. C. Hubbard, Sr., as hostess the members of the Wednesday Sewing Club and a few additional guests were delightfully entertained at her home in Wilkesboro Wednesday afternoon. The group spent an informal hour together in sewing and conversation after which the hostess served tempting refreshments.

Mrs. L. M. Nelson Entertains Bridge Club

The members of the Friday bridge club were charmingly entertained by Mrs. L. M. Nelson at her home on Tenth Street Friday afternoon. Table prizes in the game were won by Mrs. Will Blair and Mrs. Dan Carter. After play a delicious supper was served by the hostess.

McNeil-Emerson Marriage Vows Are Announced

Mr. William Alonzo McNeil announces the marriage of his sister, Mamie Gertrude, to Mr. Frederick Oscar Emerson on Sunday, the twenty-ninth of June, nineteen hundred and forty-one, Bristol, Tennessee. Cards inscribed thus have been issued here and will be of much interest throughout this section of the state.

Social Calendar

The Woman's Society of Christian Service of the Wilkesboro Methodist church will meet Tuesday afternoon at three o'clock at the home of Mrs. Julius C. Hubbard. The Young Ladies' Class of the Wilkesboro Sunday school will also meet with Mrs. Hubbard Tuesday evening with Mrs. Blalock as joint hostess.

The Spiritual Life group of the North Wilkesboro Methodist church will meet Tuesday afternoon at 3:30 o'clock at the home of Mrs. James R. McCartney. Since this is to be the last meeting under the leadership of Mrs. McCartney it is hoped that a large number will attend.

Governor Will Speak At 4-H Short Course

Governor J. M. Broughton will make his first appearance at an annual State 4-H Short Course when he speaks on the Achievement Day program of the rural youth meeting at N. C. State College on August 1. The 1941 4-H Short Course will open on Monday, July 28, and continue through Saturday morning, August 2.

L. R. Harrill, State 4-H Club leader, and Miss Frances MacGregor, assistant State leader, predict that more than 1,000 boys and girls will attend. Last year's short course attracted 990 youths and club leaders from 96 counties. "We are hoping that every one of North Carolina's 100 counties will be represented this year," Harrill said.

Presiding over the general sessions will be Robert Wood, Alamance County farm boy, who was elected president of the State 4-H Council for 1941. Other officers are: Willie Mae Daniels of Granville county, vice president; Myrtle Lutterloh of Chatham, secretary; Billy Britt of Johnston, historian.

Among the features of 4-H Short Course will be the final eliminations in the State dairy cattle judging and dairy foods demonstration contests, and the selection and crowning of the State 4-H King and Queen of Health.

Club, county and district health contests are being held throughout the State, and the district winners will come together at State College early in the Short Course week to be judged for the North Carolina championships. Likewise, county winners are being chosen in the two dairy contests—the judging contest for boys and the foods contest for girls.

Bennett - Tone Co-Star At Allen

Joan Bennett, Franchot Tone are the comedy stars of Columbia's fun-filled "She Knew All the Answers," opening at the Allen Theatre Thursday. The film, which proves that a working girl needs no guardian angels whereas, the man she works upon does, was directed by Richard Wallace. John Hubbard, Eve Arden and William Tracy are others in the cast.

Tells How To Make Good Hay Crops

A hay crop should yield at least a ton per acre and three tons per acre are possible in North Carolina, says E. C. Blair, Extension Service agronomist at N. C. State College.

Here are some of the rules for good production set out by the specialist:

All hay crops respond to a fertile soil. They take large quantities of plant food from the soil. The non-legumes get all their food from this source. Legumes, if inoculated, can draw about two-thirds of the needed nitrogen from the air, the other third necessarily coming from the soil. For these reasons, hay crops should be grown in rotations to which legumes are turned under and should be well fertilized.

The presence of plenty of usable plant food and lime in the soil not only results in bigger yields but also in hay of higher feed value. Such hay contains more protein, vitamins and mineral matter than the same kind of hay grown under conditions of soil poverty. Animals fed on this hay grow faster, develop better bones, and are healthier than those fed on hay low in these materials.

Stable manure is a valuable supplement for fertilizers in all parts of the state and should be used alone at the rate of five tons per acre in most sections.

Lime also is valuable in that it will increase the yield and mineral content of hay, if the soil needs it. While certain crops, such as alfalfa and red clover, refuse to grow satisfactorily on most soils without an application of lime, others will grow without it.

Hens Appreciate Cool Air and Fresh Water

Hens are like humans, they appreciate comfortable quarters and fresh cool water when hot weather descends upon the farm. C. F. Parrish, Extension poultryman of N. C. State College, says: "Don't be afraid of giving the poultry laying flock too much ventilation in hot weather."

Continuing, he emphasized that it takes a cool house and plenty of fresh cool water, together with good management and liberal rations of a good feed to get high egg production in the summer. The windows and ventilators in the back of the laying house should be opened to get good cross ventilation.

"Be sure that the spaces between the rafters above the plate in front of the house are also open," the specialist said. "In case of a gable-roofed house, if no roof ventilators were built in, take off a board or two at the end of the house near the roof so as to allow the hot air to escape from the house."

Parrish explained that, when the weather gets hot, feed consumption decreases and egg production begins to drop. When this occurs, it is wise to feed the layers a moist mash at noon each day. Mix the regular mash with cool water or skim milk. Be sure to feed only what the flock will clean up in about 20 minutes. Never feed the wet mash on top of the dry mash—use a separate trough. Reduce grain feeding during hot weather.

Cull out the birds that quit laying between now and September, the poultryman advised. These quitters and early molters can be spotted in the flock by watching for their pale shrunken combs, and the return of the yellow pigment to the eye rings and beaks. The early molters are usually the poor layers. It is wise to dispose of hens that have already laid two seasons as fast as they quit laying, unless they are to be kept for breeding purposes.

Summer Shelters Prove Profitable

Summer range shelters will pay as much on the investment as any other expenditure the poultryman can make, according to T. T. Brown, extension poultryman of N. C. State College.

Where more than 100 birds are kept, the shelter results in feed economy and healthier, more thrifty pullets. This assures the producer of a more economic egg production and a lower pullet mortality.

"In order to face competition more successfully," Brown stated, "the poultry raiser should be interested in any piece of equipment or practice that really gives results such as the summer range shelter does."

When the shelter is placed on clean land where ample tender green feed and shade are available, it will cost much less to feed pullets than if the birds were confined to a small yard or bare lot.

Where the pullets range on a green crop such as lespedeza or soybeans, they will get something that the feed manufacturer has not been able to put in the feed bag.

The shelter that Extension Service poultrymen have found to be the most economical and most satisfactory is A-shaped with with the eaves about two feet from the ground.

NOTICE OF SALE

By virtue of the authority contained in that certain deed of trust executed by A. J. Gould to the undersigned TRUSTEE on the 1st day of January 1923, recorded in the office of the Register of Deeds for Wilkes County, N. C., in book 130, page 41, default having been made in the condition of said trust, the undersigned Trustee, will, on July 18th, 1941, at 12:00 o'clock noon, at the Courthouse door of Wilkes County, N. C., offer for sale at public auction, to the highest bidder for cash, the following described property:

Adjoining the lands of The Yadin Lumber Company, heirs of C. J. Cowles, dec'd and the Yadin River, and others and beginning:

1st. TRACT: Beginning on a Walnut on the North bank of the Yadin River below the mouth of Stony Fork, running N. 70 poles to a stake, formerly a pine corner, thence E. 60 poles to a stake, thence S. 24 poles to a stake, thence E. 51 poles to a stake, thence South 44 poles to a stake, thence E. 167 poles to a stake; thence North 27 poles to a post oak, a conditional corner, thence S. 27 degrees E. 18 poles to a stake, thence S. 25 degrees E. 18 poles to a stake, thence S. 64 degrees 22 poles to a stake, thence S. 25 degrees E. 16 poles to a persimmon on the bank of the Yadin River, thence up said River with its meanderings to the beginning, containing 179 acres, more or less.

2nd TRACT: Beginning on a dogwood on the bank of said river, below the mouth of Stony Fork, running N. 52 degrees W. 90 poles to a pine and black oak, thence S. 52 degrees W. 44 poles to a stake, thence S. 52 degrees E. 90 poles to a stake on the bank of the Yadin River, thence with said river N. 52 degrees E. 44 poles to the beginning, containing 25 acres, more or less.

The above two tracts are the lands conveyed to A. J. Gould by T. B. Finley and wife, C. E. Finley, by deed dated January 26, 1911, and recorded in the office of Register of Deeds of Wilkes County in Book 77 page 439, and 12 acres from a Grant to said A. J. Gould dated January 7, 1891 and recorded in said Register of Deeds' Office in Book 130, page 22, which said 12 acres is included in the first tract above.

The above property will be sold subject to all taxes now due and unpaid.

A deposit of Five Per Cent of the amount bid will be required of the successful bidder at the hour of sale.

This notice dated and posted this 16th day of June, 1941.

Farm Marketing Income Smaller

Raleigh, June 1.—Cash farm income received by North Carolina farmers from marketing during the first three months of this year, receipts from the sale of crops contributed 47 per cent; livestock and livestock products, 28.3 per cent, and government payments, 24.7 per cent," Stuart said.

"Sales of farm products in North Carolina are light during the first quarter and income for these months is by no means indicative of the total income for the year.

"The State's total January-March cash farm income, including government payments, was estimated at \$29,430,000 or four per cent above the \$28,362,000 received during the first quarter of 1940," Stuart said, basing his report on a Federal-State Crop Reporting Service summary. Farmers received \$7,271,000 in the form of government payments or \$1,876,000 more than for the corresponding period of last year."

The U. S. Bureau of Agricultural Economics reports cash income from the sale of crops during January-March inclusive at \$13,837,000 or 9.3 per cent under the similar 1940 period, while income from the sale of livestock and livestock products was esti-

ated at \$8,322,000 or about 8 per cent above the previous year.

"Of the total cash income received by North Carolina farmers during the first three months of this year, receipts from the sale of crops contributed 47 per cent; livestock and livestock products, 28.3 per cent, and government payments, 24.7 per cent," Stuart said.

"Sales of farm products in North Carolina are light during the first quarter and income for these months is by no means indicative of the total income for the year.

"During the first quarter of 1941, cash income including government payments in the North Atlantic States and West North Central States was reported "just slightly smaller than in the first quarter of 1940; whereas in the remaining regions, income increased from 4 to 16 per cent."

"In the North Atlantic region lower prices of potatoes, small marketings of tobacco and smaller government payments more than offset the increase in income from poultry, eggs and meat animals," Stuart added. "Marked increases in income from fruit and truck crops in Florida and from both crops and livestock in Georgia, primarily accounted for the increase in farm income

"The land and the people and the flag—the kind of a continent the people of every race, may aspire to when the wars are over and the barriers are down to these each generation must be dedicated and consecrated anew to defend with life itself, if need be, but, above all, in friendliness, in hope, in courage, to live for."
