

Grider Speaker At Meeting Of Kiwanis Friday

Agricultural Teacher Delivers Interesting Address Before Kiwanis Club

Prof. H. T. Grider, teacher of vocational agriculture at Taylorsville High school, delivered an interesting address Friday noon before the North Wilkesboro Kiwanis club.

Program Chairman Carl Vandeman introduced Prof. Grider, who addressed the members of the club on the subject: "The Nature of Vocational Education in the High School". This work began, said Prof. Grider, under an act of Congress in 1917 and in North Carolina in 1918. He stated the cost was paid as follows: One-third by the Federal Government, one-third by the State and one-third by the county. The county is also to furnish the building, equipment and other incidental expenses.

The course includes work for boys from 12 to 20 years of age. Prof. Grider, in the middle of his talk, presented Wayne McBride, one of his pupils, who discussed the projects that are directed by the course. The young man began two years ago with two helpers and has reproduced from these six and has added to the project a brood sow, the value of his assets now being \$750.00. Mr. Grider concluded his talk with a enumeration of several old farm customs that modern agricultural science has junked.

Guests Friday were as follows:
