

### Cemetery Working Shady Grove Church

The Shady Grove Baptist church in the Adley community announced: "Everybody having relatives buried at this cemetery please come June 25th to work and clean off the cemetery. It is in bad shape and some of the graves can't be recognized. If you can't come, please send someone."

### Fifth Sunday Singings Planned

Fifth Sunday singings are planned in Wilkes county for Sunday, June 29. Southside Singing association, of which Attorney F. J. McDuffie, of Wilkesboro, is chairman, will meet with Mt. Carmel Baptist church at 11 a. m. and continue through the day. Chairman McDuffie said take singers and plenty to eat and enjoy the day. Picnic dinner will be spread at 12:45.

Chairman J. A. Gilliam announced that Stone Mountain Union singing will be held at Bethany church two miles east of Roaring River and Mountain View roads on June 29, beginning at one p. m., and that all singers are invited to attend and take part.

### Agriculture Teachers Hold Conference 9th

The annual conference of the vocational agriculture teachers was held at State College in Raleigh the week of June 9 through June 14. There were about 360 teachers present from practically all counties in the state. Wilkes county was represented by Professor C. E. Jarvis, vocational agriculture teacher of Wilkesboro high school. During the conference the teachers studied technical courses such as farm forestry, electrification, sewage disposal, visual aids, problems in teaching agriculture, dairying, insects and diseases, and horticulture. Along with most of the courses there were field trips to various parts of the college and experiment station.

### RETONGA WAS WORTH \$1,000 SAYS MR. BALL

Regained Fifteen Pounds of Needed Weight, Can Eat Anything, and Feels Fine Now, He States.

"I wouldn't take a thousand dollars for what Retonga did for me," gratefully declares Mr. Edward F. Ball, well-known resident of 817 South 17th St., Knoxville, Tenn. "I have regained fifteen pounds of needed weight and I feel better than in several years."

"Nervous indigestion gave me so much trouble I was afraid to eat anyway; and I confiner myself to the lightest kind of diet. Gas seemed to turn my stomach into a hard knot and press up against my chest until I couldn't get a deep breath. Constipation was so stubborn I had to change laxatives all the time to get any results. I lost 25 pounds and felt so all-in I hardly see how I kept going."

"Retonga relieved all this distress so remarkably that within 10 days I was eating heartily at every meal without distress. I have regained 15 pounds, don't have to take harsh laxatives, and I feel better and stronger in every way than in several years. I wish I could tell everyone about Retonga."

Retonga is intended to relieve distress due to insufficient flow of digestive juices in the stomach, loss of appetite, Vitamin B-1 deficiency and constipation. Accept no substitute. Retonga may be obtained in North Wilkesboro at Horton's Drug Store. (Adv.)

### COLD FACTS

(From your freezerlocker)

Fruits and vegetables will be at their height very soon. Be sure to plan to freeze your surplus. Blackberries are recommended for freezing and will soon be plentiful. In selecting your berries for freezing be sure they are full ripe, selected berries and not too seedy. Frozen berries are delicious for cereal and short cakes during the winter months. In preparing your berries, wash in cold water with a little handling as possible and pack in cartons using a 50 per cent sugar syrup (one cup sugar to one cup water). Immature berries may be used for jelly or jam but should not be frozen.

The best varieties of peaches for freezing are Elbertas, J. H. Hale, Golden Jubilee, Hale Haven and Georgia Belle. Peaches for best results should be left on the trees until completely ripe, that is for from one week to 10 days longer than for canning. Peaches should be peeled and sliced into syrup containing Ascorbic Acid to prevent discoloration of fruit while freezing and after thawing. To a syrup of three cups of sugar and two cups of water add one level tsp. of powdered Ascorbic Acid. The Ascorbic Acid can be purchased at the Locker Plant in small quantities.

Raspberries, Boysenberries, and cherries both sweet and sour are ideal fruits for freezing.

### There's FUTURE IN FERTILITY

Proper use of fertilizer on your farm may help you reach new levels of crop production. Even on so-called "rich land" a "balanced diet" can produce surprising results.

Yes, fertilizing pays, but merely applying fertilizer is not enough. Improper application is a waste of money... can even do more harm than good. Experience has shown that small amounts of fertilizer properly placed produce greater gains than large amounts poorly placed.

Study the three methods shown here. Use all three for maximum results... eliminate extra operation. Stop in and talk to us about modern equipment for improving your soil and increasing your profits.

- THREE METHODS...**
- SAME INTERCHANGEABLE HOPPERS**
- 1 PLANTING**—Fertilize while you plant. Greatest return from small amount of fertilizer. Stimulates early growth. Young crops grow faster than weeds—mature earlier.
- 2 PLOW-SOLE**—Fertilize while you plow. Makes plant food available to deep growing roots and sub-surface moisture. Produces impressive yields. Heavy applications possible without danger to plants. Can be applied fall or spring.
- 3 SIDE DRESSING**—Fertilize while you cultivate. Provides plant food when greatly needed. Requires half as much fertilizer as when broadcast or disced in. Convenient method for applying heavy applications on thin soils.
