FRIENDLY SERVICE SINCE 1892

*Next Best Thing to a New Road!*

YOU must understand, of course, that nothing in the world can take the place of a beautiful ribbon of improved highway—

—stretching so enticingly out into the open country, and all but beseeching you to come for a ride!

But under the happiest auspices, you will have to do much of your driving, for years to come, down roads and highways that leave something to be desired—

—and how lucky you'll be if you ride them out in a 1950 Cadillac!

In recent years, Cadillac has carried out a tremendous program of research and improvement to achieve a finer "rough-road" ride. The development work has covered steering, springs, shock absorbers, frame, wheels, tires, shackles—and all the engineering problems involved.

In the 1950 Cadillacs, this great program has come to full fruition—and the results are simply a revelation.

First, you get wonderful balance. The car "stays put"—and you have a reassuring feeling of stability, even when the going's uncommonly rough.

And your ride is amazingly level. You "float" over the bumps and the depressions, ever so gently. Only a road so bad that it deserves condemning can make itself obvious to either the driver or passengers.

And, of course, the remarkable quietness, of both body and chassis, shows up most dramatically on the roughest roads. For quality tells its finest story when the pressure is greatest.

Why not come in and get acquainted with this wonderful car? We'd be happy to see you any time.
