### HITS COMMUNIST GRIP ON YOUTH

**AFTER ADDRESSING** the second National Jamboree of the Boy Scouts of America at Valley Forge, Pa., President Truman shakes hands with Eagle Scout David Freeman, 16, of Independence, Mo., and Amory Houghton, of Corning, N. Y., president of the Scout organization. door of death, and but for the skill of the doctors and nurses and kindly care and earnest prayers of my neighbors and friends I would not be sending this communication.

I wish especially to thank my friends for their visits to the hospital, for the flowers they brought, and above all for the earnest prayers they offered. May God bless all of you.

Sincerely,  
COY MARLEY.

### Draft May Catch 400 Tar Heels

Raleigh — The first call under the new draft probably will see 400 Tar Heels sworn in, State Selective Service officials estimate.

Some 20,000 men will be drafted in the nation a Washington announcement said yesterday.

State Selective Service headquarters here now are in the process of reopening 64 draft boards in the State. The 64 to be reopened were closed as an economy measure more than a year ago.

### Soil Conservation In Wilkes

By R. E. DUNN and JASPER G. CHIPMAN

In cooperation with the Tri-Creek Soil Conservation District, Mr. Al Maxwell, Farm Forester for this district, recently marked 29 thousand board feet of timber for selective cutting on the farm of Mr. Stacy Huffman. Mr. Maxwell states that this will be "a beautiful improvement cutting."

Mr. Otto Rhodes of the Mtn. View School Community, who is using chicken manure from his own poultry houses to grow one of the finest corn crops in Wilkes County is finding that the same treatment with the addition of some lime and phosphate will really grow pasture. Mr. Rhodes pasture has been carrying almost a cow to the acre land this spring and is still in good shape. This same land a few years ago would not have grazed a cow to four or five acres.

The pines set on the farm of Fred McNeil upon Elk Creek are living good even on the more galled areas. These pines had the advantage of being set early in the spring.

Since Mr. Roscoe Hayes of Hays, N. C. started improving his pasture he says that he will need twice the amount of cattle he usually grazes to keep the grass down. Mr. Hayes, is doing a fine job of pasture and hayland improvement.
