Correspondence of the Visitor.

MR. EDITOR:—Yesterday at 12 m., one of our Hargett Street merchants, accompanied by a Wilmington Street grocer, and one of our most popular Hardware clerks, secured the services of a large one horse dray and repaired to the woods in search of that species of wild fowls, commonly known as ROBINS. Having put the suburbs between themselves and the city, they slighted and instituted their rural wanderings, overcoming all difficulties, such as hills, fences, briar patches, branches, &c. &c., with a considerable degree of patience. A careful estimate shows that they walked eighteen miles, made an extravagant disposition of nine dollars worth of ammunition, literally ruined a suit of clothes; each returned to the city at 7:30 o'clock burdened with 2 blue birds and a SICK ROBIN, each of them FRANK to admit, that they needed RES(T) for their weary limbs and the services of a TAYLOR to repair their tattered garments and fully impressed with the fact that the ancient way of catching birds by means of a little salt had played out.

Yours truly,  
SNYDER.
