POETICAL. COME IN BEAUTIFUL DREAMS.

Come in beautiful dreams, love, Oh! come to me oft. When the light wings of sleep On my bosom lies soft; O! come when then the sea In the moon's gentle light, Beats soft on the air. Like the pulse of the right— When the sky and the wave Wear their loveliest blue, When the dew's on the flower, And the stars on the dew.

SPECIAL NOTICE.

RELIEF FOR THE SORELY AFFLICTED It was the misfortune of the undersigned to have suffered, as few have every suffered before, for six long and gloomy years, from an affection of his feet and legs, superinduced by overwork, during the first year of the late war. During all that time, he was compelled to drag his emaciated frame about, on crutches. In vain he invoked the best medical talent of the country; and visited the most celebrated medicinal Springs. Worn down and exhausted, he gave up all hope of recovery. At this stage of his case, having been governed by his medical friends from the beginning, he determined to adopt a method of treatment, the result of his own reflection. It is enough to say, that this method is not so much new, as it is, the more skillful application of what has been long known, and attempted by the Physicians.

After some weeks of the most unwearied and persevering efforts, he was rewarded with the most gratifying results. Indeed, his rapid improvement and recovery, was almost magical—so much so, that in looking back upon his condition a year ago, he can, even now, hardly realize the truly wonderful improvement.

Profoundly grateful for this extraordinary blessing, he is desirous of being the means of diffusing similar benefits to those who possess not only to treat, but CURE, all manner of diseases of the lower extremities, such as old and ill-conditioned Ulcers of the legs; Varicose Veins; weak and enlarged Joints, &c., no matter of how long standing. It is one of the great advantages of his mode of treatment, that no restrictions are imposed on the patient, as regards diet, exercise, &c., and for the most part, little or no medicine is used.

The charges shall be in accordance with the general depression of the times; and those really indigent, will be treated "without money and without price."

EDWARD SILL, M. D. Salisbury, N. C. Feb. 12-14

INSURANCE COMPANIES.

THE NATIONAL Life Insurance Co'y

OF THE UNITED STATES OF AMERICA. WASHINGTON, D. C.

Chartered by special act of Congress, July 25, '68. Cash Capital paid in full \$1,000,000.

It is no longer a question with any man, who tenderly loves his wife and children, who considers how helplessly would be their condition in case of his death, as to the duty of taking out a LIFE POLICY, but as to which Company he shall pay his money.

If he reflects a moment he will conclude to patronize the Company which shows the greatest degree of vitality, which extends its business over the largest area, which is a Home Company in every locality; which furnishes insurance at the least cost; which issues no policies that are forfeitable should he be unable next year, or any subsequent year to pay his next premium; and which is undeniably able to meet all its promises.

With these feelings and views, he looks over the newspapers, and by the time he gets through reading the advertisements of Mutual or Mixed Companies, he finds his mind so filled that he is at a loss where to go or what to do. He can not comprehend one-half that is written, and concludes that none but Actuaries who are familiar with the principles upon which Life Insurance is based, can comprehend or explain anything about dividends and his liability for notes given in part payment of premiums. In his dilemma, he looks into "the plan adopted by the National Life Insurance Company of the United States of America, and finds just what he wants:

AN ALL CASH PLAN, reduced to the lowest minimum rate, like any commodity in market, so much insurance for so much money. No stock to be held; no interest to be paid; no anxiety about Assessments; no apprehension of his being required next year if he does not pay his annual Renewal; and the Rates so much lower than other Companies, that he realizes a large Dividend, in advance, than other Companies can pay him in the future.

He finds that, instead of this uncertain promise, at present high in price, that the National Company has reduced its rate to such a low rate as to put on its paid up Capital of

\$1,000,000

As a guarantee fund, that its contracts will be fulfilled, like those of others, cheerfully and to the satisfaction of its Agent to make his application for a Policy. Hence the unprecedented and most wonderful success of the National as compared with the other Mutual Companies. The Company issued its first policy on the 1st of August, 1868, and up to March 1st, 1899, had issued

Amount insured, \$10,465,500 00
