In excavating for the piers of the bridge over the Missouri river, at Omaha, a log of cedar was found in a good state feet below the river bed.

From the Rural American. HOW TO MAKE GOOD FARMERS.

This subject has often been discussed. Various opinions have been offered, some of which are very good, others quite inferior. I propose

to make a few suggestions for the benefit of the readers of the Rural. There are thousands of farmers in the world who think nothing but physical strength is re-10 Copies to one address, ...... 20.00 coarse drudgery, and yet there is no human pursuit so intimately connected with every depart-ment of science. It is this erreneous and most pernicious impression which has degraded agricultural pursuits in the estimation of so many, and has driven thousands of intelligent and pro-Special notices will be charged 50 per cent mising young men from their homes in the country to the cities and to ruin. When will farmers rise to the true dignity of their calling? A boy is apprenticed for years to enable him to acquire sufficient skill to make a coat, a shoe, or a hat, but farmers are supposed to be born such. very seldom meet a man, whatever his early education may have been, who does not feel himself perfectly competent to manage a farm. It equires years of preparatory study to fit a young man for any of what are denominated the learnd professions. To become a lawyer, a physician or a clergyman, he must devote four or five vears in the colleges, passing over his books and listening to lectures. All this is well enough,— In fact it is indispensary necessary; but anything in the shape of a human being, who has sufficient physical strength to enable him to hold a plane, wield a scythe, or harness a horse, is considered 4 50 6 25 8 50 13 00 22.00 chough for a farmer. Why is this? Can it be 6 00 9 00 1: 00 20 00, 30,00 supposed when rigidly considered, that such men 8 00 11 00 15 00:25 00 37.50 without mental culture, can make "the princi-11 00 16 00 20 00 30 00 45.00 ples and discoveries of some of the most profound

acquainted with the business so that it may be conducted with infinitely more case and success. Let the importance of respecting the science and the vast importance of making handsome outpursued farmers' sons would become intelligent agriculturalists and useful citizens. FARMER,

A CURIOUS MELON .- The wondrs pertaining organized structures are not confined to ani teresting. In a tract of country in the south-western part of Africa, distinguished for its dry but rich soil, a gigantic percunal melon has been discovered, which is a most delicious, wholesome fruit, and which is largely consumed by the ac-tive inhabitants as food. In order that this melon may flourish it is necessary that it should-strike its roots down through the sand thirty feet to reach permanent moisture. This it does, and lighter, tighter, and stronger, than in any grows in great luxuriance where all else is shrivrecord of the monoply of any new material cring of long, sharp terrible thorns, which so laare glad to leave them alone in all their tempting freshness. Man, with his hands and sharp knives, finds little difficulty in opening the luscions fruit. The natives have no necessity for putting fences about their melon patches, for the plants are self-protective.

ments in France and Holland have shown that sunflowers, will neutralize the deleterious effects of exhalations from marshes This plan has been tried with great success in the fenny districts near Rocksford, France, and the authorities of Holland assert that intermittent fever has like the conebearers, it emits ozone, and destroyproducing forer.

AN OLD FARMER BANTERED TO A law of nature, he proceeds to beat and stone him TRIAL OF SPEED-HIS RAWBONED in the streets. NAG COMES OUT AHEAD.

The topic of conversation to-day in sporting circles is the race of yesterday over the Guinotte track. It is a story to good to keep, but out of pure sympathy for the lacerated feelings of a doen gentlemen who thought they knew a thing or two about horses-but were badly picked up by a greeny yesterday-we won't give the names

of the sufferers.

The race last Wednesday afternoon was attended by quite a number from this city and tended by quite a number from this city and elsewhere. Among those present was an old and seedy-looking farmer from near Richmond, Ray county. Along the fence he had three lank, rawboned horses tied. After the advertised races were concluded, the aged agriculturist was bantered to put up some money on one of his "plugs," and so help to get up a "serub race."— He replied that he believed that animal, points ing to an old mare who stood with her head down and half asleep, could run pretty tolerable well if she was "trained." "But," said he, "she's been at work all the spring and summer, and ain't fit to run now."

While several sports were trying to enjoin the old fellow into a wager, another party slipped around to the rear of the stable where stood "Punch," a very fleet goer for a race of 300 vds. of the future. Punch is, in fact, one of the fastest racers for a short distance that is to be found in the State. blanket was stripped from the nag, an old rope halter, torn bridle, and half-worn saddle placed on him, and he was quietly led a short distance and tied to a fence.

After considerable talk, the veteran son of the ordinary religious feeling. On numerous occasoil burst out with the proposition to bet \$25 that the mare could beat any other ordinary horse on the ground. He was then taken to where Punch was tied, saw that the animal looked to be anything but a horse kept for racing, predicted approaching earthquakes and disasters and expressed himself satisfied to run his mare of the most tremendous character, and concluded against "that air horse."

Then a dozen offers to put greenbacks against ais old horse were offered. The farmer, who Va., had been sold to a party of gentlemen, erence only to the too generally prevalent opinan equal amount put up by several parties, in

anty of Bowan at the Court House in Salis care, from which the fibre can be made in mers are awakening to the fact that an intelli- by the "knowing ones" of the town, who chuckry, on the 3d Monday in September and any quantity required by the wants of the gent mind is a far better director or a strong led over the "soft thing" they had secured, until the entire pile of the "green horn" had been covered.

is a science. They are beginning to realize the necessity of understanding the principles which

men, as the "old green horn" received the fifteen hundred dollars he had won? Souldn't wonder. And when they rode away from the understood and the necessity of each being suf-ticiently studied to make all our farmers better any perceptible degree? Scarcely. The nice trap they had fixed for the old man didn't catch him, but he worked out his own little game most beautifully .- Kansus City Bulletin, June 30.

### AMERICAN BIBLE SOCIETY.

Ira T. Wyche, Agent for the American Bible society, issues the following circular from Trintv College, N. C.:

To EVERY CITIZEN OF NORTH CAROLINA .-The American Bible Society was instituted for the single purpose of increasing the circulation of the Holy Scriptures without note or comment. Since its organization in 1816 it has sent outmore than twenty-five millions of copies of the Scriptures in our, own country and in other lands. Its facilities for corresponding to the same spine down the threat of the find treat the same alive and squaring. The youngsters are as lively as crickets, and may occasionally be seen in squads of a dozen or so at lands. Its facilities for corresponding to the same spine down the threat of the find treat.

but a return to Bible principles and procepts can the beginning, he determined to adopt a remedy the evils that now afflict us. Let us put method of treatment, the result of his own his word in the hands of all. That word which reflection. It is enough to say, that this is able to make us "wise unto salvation"-"a method is not so much new, as it is, the more making wise the simple," it affords comfort and unierring counsel. "It is profitable for doctrine, for reproof, for correction, for instruction in righteous that we may be perfect thoroughly furnished to all good works," able to save the soul !" Who will assist in placing this blessed book in the hands of all the people? Will not you?

the hands of all the people? Will not you.

We come not to interfere in any way with any
Profoundly grateful for this extraordinary party in Church or State. We come with nothing but God's word—his word to man—toe one, to all of every clime -of every country-to every creature in all the world, IRA T. WYCHE.

THE CONFLICT OF RACES IN AMERICA.

Alone among the races of the world they (the Chinese) confront the Englishman, and produce as much work with less pay. Other laborers are often found to work for less wages than the English laborer, but they prove in the end the dearentirely disappeared from districts where the sunflowers have been planted. Though the above facts appear to be proved, it is not yet ascertained what effect the sunflower produces on difficulty, and shows a balance in his own favor, the atmosphere, whether it generates oxygen, and the resentment of the manual laborer he unlike other plants of rapid growth, or whether, der-bids is a necessary consequence. "We cannot live, the Californian in effect says, "upon of preservation at a depth of seventy-two ed the animal and vegetable germs of missus that which satisfies a Chinese," and, is pursuance of that self preservation which is the first

We venture to think the conflict of races in California will not be solved by import or duties or s-reet outrages. It would appear that in Cal-ifornia itself there are persons who find the presence of the Chinese useful and convenient. The California sections of the Pacific Railway were made with their assistance, and while the work was thus cheaply done it bears comparison with the sections completed "navvies" from another world. The same mail which tells us of other world. The same mail which tells us of the vigorous steps taken in California informa-us that a convention has been held at Memphis to devise means of bringing Chinese into the cot-ton, cen, sugar and rice fields of the South. The Mississippi and Missouri valleys, the mines of the Colorado, Nevada and Arizona, the prairies will be provided by Indian Cribes, was the contested still haunted by Indian tribes, may be contested between Chinese and American immigrants. It is impossible to suppose that the Chinese can be kept out, and speculation may be better employed in contemplating the functions they may hereafter discharge in the wonderful polity into which the States are destined to grow. Inheriting a civilization more ancient and economic methods more perfect than the European can boast, but destitute of that strength and toughness of moral fibre which supports authority, the Chinese may be welcomed as assistants in colonization; they need not be feared as the dominating race

Another Prophet. - Wonderful Things Predicted—Death According to Appointment.—A short distance from this city resided an old gentle-man of most estimable character and more than sions his singular prescience of events has startled his friends, and persons skeptical of what his revelation by the announcement that they would know him to be a true prophet from this, his old horse were offered. The tarmer, who appeared to loose all his wits, took up the bets one after another till he had staked \$250 against an equal amount put up by several parties, in sums of \$10 to \$50. that he himself, would certainly die exactly at It was agreed to postpone the race till yester- in vain, for exactly at four o'clock on last Thurs-\$200,000, and one is worth \$400,000, though it is only a few years since the Chinese colonization began. In the Phillippine Islands, where it is older, the Chinese and their race are mixed; they are proprietors of most of the lands in the country, and the natives, less intelligent, sinking into the working population. The Chinese usually marry when and where they can find wives. In the East Indies they have intermarried with the Majays and the Tagals, and in the Sandwich Islands they wed with the Kanakas, though the latter are professed Christians. In Peru they are settling in considerable numbers, and well were it for every State of South America if the Chinese would come with their industry and love of order. If they find their way into the Southern States, either the negroes will have to quit work or become more capable

A TRUE SNAKE STORY .- On the Fourth of July last one of Wardwell's "pets," while on a little excursion into the country, came upon a large moccasin snake, which he succeeded in capturing. He gave it to one of the guards.—
He caged the reptile and tried to domesticate it. Five weeks have elapsed, and during that time the snake, although apparently in first-rate health lands. Its facilities for carrying out its sole object—the circulation of God's word—are greater now than ever before.

The gentleman having this happy family in charge has been at a loss to know what to feed give to those unable to pay.

This is the work to be done in North Carolithat they relish. A day or two ago a live frog them with, and has not as yet found anything disciple of Jesus—every friend of man—every patriot—every one who desires the prosperity of his country—one and alt—to aid us in this work.

The American Bible Society has acted nobly, eight inches long and armed wit the sharpest of venom pointed fitngs.—Richmond Dispatch.

### SPECIAL NOTICE.

RELIEF FOR THE SORELY AFLICTED It was the misfortune of the undersigned to have suffered, as few have every suffered war. During all that time, he was compelled to drag his emaciated frame about, ou his will. He hath made known to us his name crutches. In yain he invoked the best medical talent of the country; and visited the skillful application of what has been long known, and attempted by the Physicians.

After some weeks of the most unwearied and persevering efforts, he was rewarded with the most gratifying results. Indeed, his rapid improvement and recovery, was almost magical-so much so that in looking back upon his condition a year ago, he can, even now, hardly realize the truly wonderful im-

blessing, he is desirous of being the means of diffusing similar benefits to those who may be similarly afflicted. He therefore, proposes not only to treat, but CURE. all manner of diseases of the lower extremities. such as old and ill-conditioned Ulcers of the legs; Varicose Veins; weak and enlarged loints, &c., no matter of how long standing. It is one of the great advantages of his node of treatment, that no restrictions are imposed on the patient, as regards diet, ever eise, &c., and for the most part, little or no

medicine is used. The charges shall be in accordance with the general depression of the times; and those really indigent, will be treated "without mon.

ey and without price."
EDWARD SILL M D Salisbury, Y C.
