FROM JOHN QUINCY ADAMS.

The following letter from John Quincy Adams, late the Democratic Governor of Massachusetts, to a citizen of Missouri, has been given to the world through the columns of the St. Louis Republican :

OUINCY, May 6, 1871. A. Warren Kelsey, Esq. :

DEAR SIR: I have the honor to ac knowledge the receipt of a communication from you enclosing two extracts from newspapers upon which you request my criticism; and I infer from your letter that you wish to learn my opinion upon the public questions discussed in those

Short of honor and good faith no sacrifices should be demed severe which would suffice to lay that haunting spectre. For that reason I deplore the balting, hesitating step with which the Democracy is sneaking up to its inevitable position. For that reason I share your regret at the studious ambiguity which seems to search for a on the silk. Planters and fleir Teams.

VALUE OF RE-PLANTED CORN.

The practice of re-planting corn is common enough, being usual on every farm and plantation where the stand is ing to the suggestion of an intelligent value in the crop, more than is apparent, whether the first stand is good or not curs, he still replants in about every fifteenth or twentieth hill in every tenth or fifteenth row, either cutting out the plant and the druggist found, after a vast abut they are told that it will be dangerous already growing, or putting in an extra hill, if the space will admit. The purpose of the replanted, or late stalke, is to furis beset with pitfalls; but even a bad nish polen, in case a dry spell should wilt the tassels of the first planting before the grains are filled. The Catholic hero of "Lothair," the

young Maranis of Bute, although admited to be the greatest "eatch" matrimoni ally speaking, in Great Britain, and one of the largest land owners in the realm, has never yet made his respects to the Queen at court. This singular circumtance is now accounted for by the Court Journal, which states that the young Marquis promised his mother on her deathed never to permit himself to be presented to Queen Victoria. The reason of this extraordinary promise, which the Marquis has religiously kept, is to be found in the implacable hostility of the Marchioness to the queen. The lave Marchioness of Bute was the sister of Lady Flora Hastings, the young and beautiful maid of honor, whom Queen Victoria. then a girl of 18, suffered soon after her accession to the throne to be driven from er presence and hunted to death by slanders long since disapproved. The cold and cruel conduct of the young sovereign at that time the family of the vicim have never forgotten or forgiven .-When the queen some years ago visited Rothesny Bay in her yacht, and lay for several days in sight of the superb residence of the Marchiquess of Bute, Mount Stuart House, the Marchioness not only refrained from attempting to pay her all the blinds of the windows in Mount Stunt House to be kept closed so long as the royal yacht lay within signt of them Time has not softened in the son the bitter sense of injustice which hardened the mother's heart. It is even said that herror at the notion of being obliged to consider Queen Victoria the head of his church plays no small part in inducing the Marquis of Bute to abandon that church for the communion of Rome.

A sudden mental emotion can send too much blood to the brain; or too great mental excitement does the same thing. It is the essential nature of all wines and spirits to send an increased amount of lood to the brain.

The first effect of taking a glass of wino or stronger form of alcohol is to send the blood there faster than common; hence t quickens the circulation; that gives a red face; it increases the activity of the brain, and it works faster, so does the the brain faster than common, it returns faster, and no special permanent harm results. But supposing a man keeps on drinking, the blood is sent to the brain so much faster than common, in such larger quantities, that in order to make room for it the arteries have to enlarge themselves; they increase in size, and in doing so press against the more yielding flaccid veins, which carry blood from the brain, and thus diminish their size, their pores the result being the blood is not only carried to the arteries of the brain faster than is natural or healthful, but is prevented from leaving it as fast as usual ; hence a double set of causes of death are set in operation.
