POETICAL

ET US GIVE THANKS,

BY ELIZA COOK Liet us give thanks, with grateful soul, To Him who sendeth all To Him who hids the planets roll, And sees a " sparrow fall." Though grief and tears may dim our joys, And care and strife arrest, Tis man, too often that alloys The lot his Maker blest : While sumshine lights the boundless sky, And dew drops feed the sod-While stars and rainbows live on high-Let us give thanks to God.

We till the earth in labor's health, We plant the acoru cup, The fields are crowned with golden wealth, The green tree springeth up ; Theisweet, eternal waters gush From fountain and from vale ; The vinevards blush with purple flush, The yellow hop leaves trail; And while the Harvest flings its gold, And cowslips deck the sod-While limpid streams are clear and cold, Let us give thanks to God. The flower yields its odor breath,

As gentle winds go past ; The grasshopper that lurks beneath Chirps merrily and fast ; The ring dove coos upon the spray, The lark full anthems pour ; The lees start with a jocund lay, The waves sing on the shore ; Homannas fill the wood and wild, Where human step ne'er trod ; And nature, like an unweaned child, Smiles on its parent God,

Say, Brothers, shall the bird and bloom Thus teach, and teach in yain? Shall all the love-rays that illume, Be lost in clouds of pain? Shall hearts be dead and vision blind To all that mercy deals? Shall soul and reason fail to find The shrine where instinct kneels? Ah, no !- while glory lights the sky, And beauty paints the sod-While stars and rainbows live on high, Let us give thanks to God.

Work done or Mechanic get on without advertising ; but it is has cheap for cash or approved notes ; or country produce tawork, and all who have properly tried the experiment know well the advantage both of oil to machiney, in advertising to business.

And smiles are laughing there, The heart that beats within is light, And free from pain and care. A blash may tinge the darkest cloud, Ere Sol's last rays depart ; And underneath the sunniest smile May lark the saddest heart.

Mirth's sudden gleam may light the cheek, Though joy be far away, As blossoms oft adorn the tree That's hastening to decay : Ahs! 'tis but the varying hue Of April's wayward hours-A sunbeam bursting brightly through, When all beneath are showers.

For there are pangs the sorrdwing heart Will oft in darkness shroud. That lurk within the lonely depths Like lightning in the cloud; As falls the shadow on the path. When bright the sunbeams glare, Whichever way our thoughts are turned, "That darksome shape is there.

Though brightly o'er the hollow cheek The smile, the laugh may break, Like bubble's bursting on the breast Of Ascheron's dark lake : They are but outward signs to hide The deadly pangs we feel, As o'er the lone and mouldering tower The rose is aught to steal.

### OPTICAL ILLUSION IN THE MOUN TAINS.

The following interesting extract from a private letter descriptive of a Singular optical illusion on the Catskill Mountains, is written by an eye-witness:

"The afternoon (Tuesday, August 14) was a memorable one for the Mountain. The optical illusion of last Monday week was reproduced, but more transcendantly beautiful than it had ever appeared before, It is the third time in twenty years that this extraordinary phenomenon has been perceived. Mrs. A. and myself fectious as the Yellow Fever." were sitting on the rock in front of piazza. when she suddenly exclaimed, " Look ! look I" I did so, and the whole hotel was surrounded in the cloud before us. The whole house was assembled immediately and we ran out to the point of the rock from which the phenomenon of last Monday had been perceived. We were scarcely there a minute when a beautifully arched rainbow we found in the cloud, ex actly in the centre of which was seen the entire group, precisely as they stood on the ledge of rock. It was not merely their shadows, but the entire form of each person in the group was distinctly visible; each person saw the whole group, not merely the reflection of his own image. This lasted above five minutes, when the rainbow disappeared, and the phenomenon of Monday last succeeded ; each person saw his own shadow of huge dimensions, reflected on the cloud surrounded by a halo of light, but was unable to see that of his neighbor. I shall never in my life see anything like it again, and if I had not seen it. I could have formed no conception of its effect, it was perfectly thrilling. The poems of Ossion, the Children of the Mist : the Death-fetch of the Germans; the Spectral Phantoms that were fearful visions to less enlightened ages, were all realized distinctly and palpably before us. This visitto the Catskillshas revealed to me more of the wonders of Nature than all else that I have seen put together."

two tumblers of salt water, and then in. "widow's joy was turned into mourning" ing fingers of each hand. Let them recease. Then contract the muscle of one arm by any effort of the will, and a deviation of the needle will instantly indicate a contrary current of electricity in pends on the muscular development. galleries of the mine with carbonic acid.

The experiment was tried and was successful.

#### A ROD FOR GOSSIPS.

The following paragraph, which we find floating in the newspapers, lays it on the gossips with unsparing hand : "The slanderous woman poisons the atmosphere of an entire neighborhood, and blasts the sanctities of a thousand homes with a single breath. From a woman of the class nothing is sacred; she fattens on calumny, and upon slaughtered reputations. She is the Ghoul of Eastern story, transferred from the Arabian Nights to the circle of the fireside. She never asserts anything-she merely hints. and supposes, and whispers what 'they say.' Every neighborhood in the city is infested with some creature of this sort, and in country towns they very often are afflicted with two or three of those Ghoul Women. One is enough to set a hundred families by the ears, two can break up a church, three are sufficient for any kind of mischief, from the separating of the husband from his wife, to blasting the fame of a stainless girl. A pure woman is simply an angel embodied in human shape; a slanderous woman is something worse than the Cholera-certainly as in

There is more truth than poetry in the above. Pass it round. Preserve it, and whenever you hear one of those veteran gossips, with a furitive smile, beginning their "they say," read the above aloud.-Unhappily, there are male and female gossips, but, with a little alteration, the above " blessing" will apply to both.

Mr. Guernsey, extremely difficult to say why a husband proposed to put out the fire by filling the should not leave a homestead to his wife without being compelled to let her share it with a successor to his bed, and to use it as a nest to hatch a brood of strangers to his blood.'

> Steamboats Playing at Hide and Seek. -A heavy fog hung over Milwaukee and the lake. Wednesday evening, rendering it impossible for vessels to see their way into or out of port. The steamer Pacific, from Chicago, and the Superior, from Buffalo, arrived off our harbor between 8 and 9 P. M., when the fog was at the densest, and impervious even to the rays of our friend Joe Sherwood's bright and well kept light on the bluff. The Pacific, not being able to make light on the bluff, or the pier, rang her bell. The Superior, which was groping about in the fog a mile or two further north, taking the Pacific's bell as a signal from the shore, rang her's in answer. The Pacific, deceived in like manner, put off in the direction of the Superior's bell, ringing her's at intervals. The Superior, at the same time, Fall and Winter Fashions Received was hunting about for the pier whence the ringing they heard was supposed to proceed. Nearly two hours were passed in this agreeble occupation, the pier unaccountably shifting its position every few minutes, and baffling the efforts of either boat to find it. At length the mys- TAILORING AND CUTTING BUSINESS a regular game at hide-and-go-seek in the fog, got safe alongside of the pier.-Milwaukee Sentinel.
