

the customs, but liberated for want of some specific law, and from the plea of its being manufactured copper.

A most valuable invention has lately been made by Mr. James Hamilton of New York, which will be the means of saving an immense quantity of labor in this country. It is a machine for felling trees. The New York American gives from the New York Mechanic's Magazine a description of it accompanied by a drawing. This machine requires very little more space for use than is required for the swing of an axe, and may be used in almost any situation in which a man can use an axe. It may be moved freely by one man, who can cut through a stem of two feet diameter in five minutes; two men will however work it to more advantage. It is so constructed as to admit of saws of different lengths according to the size of the tree. A committee of the American Institute at New York commend it in strong terms. It cuts the stumps uniformly of an equal height, and at least a foot nearer the ground than is usual, whereby the most valuable part of the timber is saved, besides all the after labor of squaring the end. The cost of the machine is about fifty dollars, and it is believed that with it two men can fell as much timber in given time as twenty can with the axe.

Rail Road Accident.—On Monday afternoon, as the Locomotive and train of cars, from Saratoga to Balston, came to where the old Saratoga road crosses the rail road, about half a mile east of the latter place, a one horse wagon, with a man and woman in it, stopped on the track; the engine came up at the moment, crushed the wagon, killed and mangled the woman in a shocking manner, and killed the horse—the man escaped uninjured.—Pennsylvanian.

FOREIGN.

Later from France.—The packet ship Natchez, Captain White has arrived at the port of New York from Havre, bringing papers of that port and Paris to the 24th inclusive.

There seems to be very little news in England the Parliament is engaged in discussing the 'Irish Church Temporalities Bill'; and the speech of Sir Robert Peel on that subject engrosses the public attention.

In France the alleged murderous plot against Louis Philippe—the detaching a body guard for him, and the speedy meeting of the sovereigns at Kalisch, occupy public prints.

Telegraphic despatches from Spain (say the Paris papers) detail an important engagement between the contending parties, which resulted in the signal defeat of the Carlists.

Arithmetic by Machinery.—A cabinet-maker of Milan has invented a machine with cylinders, which executes any sum in the first three rules of Arithmetic, for which the Institute of Milan has awarded him a gold medal.

\$25 Reward.

RANAWAY from the Subscriber, on the night of the 20th September last, my negro man named DANIEL, 20 or 21 years of age, 6 feet high, black complexion, has a pleasing countenance, inclined to be knock-kneed, his feet somewhat turned out, particularly his left foot, his clothing not recollected. He was formerly the property of Asabel Farmer, his mother, brothers and sisters belonging to said Farmer—his father is in the same neighborhood working about as a blacksmith, nearly as a free man. It is believed he is lurking about in the neighborhood of said Farmer, also in Nash county. The above reward will be paid to any person that will apprehend said negro, and deliver him to me or secure him in any jail so that I get him again. I forewarn any person from harboring said negro, or carrying him off, under the strict penalty of the law.

D. RICHARDS & CO.
Tarborough, Nov. 27th, 1834.

Notice.

AS I have not been known to the people, and they have not been acquainted with my work, I therefore will make some remarks upon my business. All persons having any

Brick work or Plastering

To do, or any kind of brick work whatever, particularly such as brick walls, cornices, facias, strait arches, scheme arches, hips and valleys in tiling and water courses, ail piers, plasters, rustic work, &c. would oblige themselves in employing me, as I have got a form or architect, (printed in England,) superior to any that ever has been seen here; it is a new form and the first one that ever has been brought here. And with what I have learned here, and with the assistance of my book, can execute any job of work in a neater style than ever has been done about here. As I am now capable of carrying on the business, I would be very thankful to the people to employ me; and if my work does not prove to be better formed, stronger and nicer than any that has ever been done by any brick mason in this section, I will not charge any thing for my work, and will do it on as reasonable terms as could be expected. On any large jobs I would wish to make the bricks, for I know that I can make a smoother brick than ever has been made any where here.

I will warrant my work from bursting, smoking, or any thing else that does not become the work, and to be superior to any that has ever been done here.

All orders from any distance may be sent to Tarborough Post Office, or any person living not a distance may come or send word to Silas Everitt's, near Little Coneto Creek meeting house, Edgecombe county.

NEW

Coach & Gig Manufactory.

THE Subscriber respectfully informs his friends and the public in general, that he has commenced business for himself on his lot in Tarborough, near the Bridge, where he will be prepared to carry on the above business in all its various branches. He served a regular apprenticeship under Mr. Thos. Cobbs, of Raleigh, who carried on the business very extensively, and kept in his employ regular northern workmen. In several years acquaintance with the business in one of the most extensive establishments in the State could ensure his success, he feels confident he should meet it; but he is perfectly aware that attention is equally necessary, and this attention he is determined to render. He hopes, therefore, that all persons who may favor him with their patronage, will never become dissatisfied or disappointed. His work shall be faithfully executed and of the best materials. He expects to have in a short time a general assortment of materials from New York, which will enable him to do his work not inferior to any done in this section of country. Repairing done with neatness and despatch.
