Muchte John.

Suspuile, Nash county. He will stand of pollARS the single leap, TWELFE galari the season, and TWENTY Dollars av responsible person will make up a lab of five marcs. The senson is now name acrd, and will terminate by 1st Juoneith.

From the anxiety we have to see the people of this country improve their stock arses, we are induced to stand MUCALE JOHN as heretotore dome, at

he above named extremely low prices. From the circumstance of his standing so st, the poor man will have the opportunig of raising blooded stock, as well as the an of capita'; whereas if he stood as high is many others, (by no means his superior a point of peuigree,) this fair opportonity ald not be afforded. Almost every indiideal who has a stud horse, is very anx ins to give him if possible a reputable character, and is extremely apt to give in a character which he does not really stit. But candor and justice demand that such has never been the case with this morough bred horse. For it is certainly ises, which cannot in truth meet with radiction, that he has heretofore labored under all the disadvantages which could mibly befal a borse of his kind. In the inf instance he was raised as a mere calf, without scarcely receiving any attention, which was probably the cause of his not being any larger. But after a time the consideration, (and a just and correct one 100.) having been taken, that he was a colt ; must excellent pedigree, he commenced minoring and has rised to his present mest romantic and grand appearance. But having labored under the disadvantage dian treatment during the first years of is life, cannot alter his pedigree, nor inand should not injure his character as a notk horse; for his colts are generally vety large. In the second instance, it may and has heretolore probably been a serious djection with some, that he has never usexamine into the cause of this, which in he done by only making a few reunits. He was while in training outrapossily obstinute and consequently moving such to be the fact, Le was rightbemsidered to be an unsate horse to tisk sy upon, and in consequence of this certainly unfortunate quality in him, he satisken off the track at a very early age. though it is a fact which is certainly inintrovertible, that when he did by himall runkindly he in every instance run in etcellent time. But even admitting that he has not been a successful race horse, withink that any man from the above exparation, as well as after examining his pet see which is given below, will acknowledge that it such has been an objecton heretofore, that it should not be othersise than dissipated now. He never would run kindly, only at his own will and pleasure. But suffice it to say on this point, that had it not been for the unfortunately datinate disposition which he possessed that he could not, judging from trial and very other circumstance connected with it that he must have been a race horse of considerable reputation. MUCKLE JOHN has never had but two col's to yet go ou the Torf, and both have been successful Slorey, a very small little mare, has run a great many successful races two and three michents; but it is true she has been beatmalso, but whenever such was the case it was done with the utmost difficulty, and the horses. Examine the Turf Register, board, or to that nas issued a few years past, and any person can be satisfied with the correctness of the above statement. It would be too indious in an advertisement of this kind to concerne all the different races which bar bera run by this little mare, as any man can satisfy himself by enquiry or exone of his colts was a gray mare by the mans of Janet, that only run one race, which was at Greenwood, Halifax county, ta the two mile day, and won with consitrable ease. There are some people too the probably not posting themselves to the trouble of examining the many good crosses which he has, both of imported and American stock, urge as an objection that he stands too low to be thorough bred. hat certainly such is an unjust objection, for we cannot arrive to a fair and correct conclusion, but by making an examination ma his pedigree. It is certainly unnecesmis to say more as to this horse by way firmark, as he certainly cannot be forlid a reputation not heretofore acknowledged, if he should live, in progress of ime. He has some few fine colts which sill shortly make their graceful appearance the track, and prove to the world that can be not only the sire of work horses. but can also be the sire of race horses that passess both the essentials of speed and tame. We therefore think that if the peohe wish to improve their stock of horses, that they cannot do it at a more correct and propitions time, than by accepting of the present favorable opportunity of intro-ducing their mares to Muckle John.
