## Information Concerning Tryon Colored School

There seems to be some misunderstanding about certain equipment for the new colored school.

Under war conditions it has been a very difficult job to bring this building operation to a full completion. The work has cost more than under normal conditions because material advanced so rapidly and most items had to have a priority secured before they could be bought at all. That added greatly to the total cost.

The School Board had to borrow funds to finish the school and found finally that there was not quite enough to properly seat the auditorium. There were sufficient funds to procure and arrange all class room desks and other equipment necessary for the operation of class work in all the rooms. Very cheap and inadequate benches could have been made for the auditorium but it was felt that if a little more money was available the proper type of bench or seat could be procured.

In order not to waste money on inadequate and useless benches for the auditorium the Parent-Teachers association suggested that they could raise funds from friends in Tryon and they undertook this. With this additional help the auditorium will be more completely equipped. There has not been money asked for any other part of the school or equipment since state, federal and Tryon School District funds have built and equipped the new plant.
