## Farmers Can Now Have Harvest Help

Any farmers in the county who, on account of war conditions, finds it impossible to take care of his own farm crops should make a request to this War Board or to the county agent's office. After careful inspection if the War Board finds that the farmer and his family have done all within their power to take care of their crops, it may request that the farm labor supply committee furnish sufficient number of high school boys or other available workers to do the job that is needed to be done on the farm.

The committee decided that it would be necessary to transport the workers in groups of not less than ten per load. These are to be hauled either by the farmer at his own expense, or by the neighborhood hauler who will receive 6c per mile for his travel. One-half of the travel expense will be paid by the farmer and the other half by the chamber of commerce, Kiwanis and Rotary clubs of Tryon; when the hauling is done by the neighborhood hauler.

The board appointed by the Tryon chamber of commerce, Kiwanis, and Rotary clubs, consisted of Dudley C. Smith, Carroll P. Rogers, Marcus Caldwell, Al Bowen, W. E. Sawyer, Dr. W. S. Green, J. A. Wilson, and Mr. R. McCown. The members of the USDA War Board who met with the Tryon committee were B. E. Hinsdale, Jr., chairman; W. R. Hoots, vice-chairman; J. A. Wilson, secretary; J. J. Matthis and G. C. Thompson.
