FISHING

For Pleasure and Relaxation

By George Beale

I went out to wet a line on the old Winston Lake during the unseasonable warm weather. I didn't catch a thing, but I did get a lot of inspiration. With several bass lure to test and report on, I could not find any better weather or water conditions necessary to give the new items an action test. In a few weeks I hope to give the lures a test of their fish catching abilities. If they prove out for this section, you will be the first to know.

I was surprised but happy to learn that so many fisherman went out and took advantage of the warm and sunny weather. There were crappies caught galore and some big bass got in on the show. William H. Andrews and his wife, "Gwyn", got into crappies at Dixie Shores on the Badin Lake. The entire

Andrews family are ardent fishermen, or fishing persons. Another surprise was to learn of George Hill, president of Winston Mutual Life Insurance Company, hanging a lunker bass, around 5 pounds, on a plastic worm. I am trying to figure out just when George was bitten by the fishing bug. Must have gotten the fever when he became exposed to the recreational atmosphere of Badin Lake. Badin is noted nationally for bass fishing. One can also enjoy bream, crappie, white perch, yellow perch, white bass, and channel cat fishing on the lake. For the best white bass fishing go up the stream from Badin to the Tuckertown Dam. Nearby the Idol Dam has produced some good crappie and white bass fishing.

the time when you will likely catch that trophy fish. To fulfill that desire you must be there at the right moment. That is the secret of trophy fishing, so keep that line and hook in the water until the spawning season is over.

Again, get your state fishing license and pick up a copy of the state's fishing laws. Don't be discouraged by the return of cold weather, it won't last. Watch those fish, they have to spawn for nature will have it's way. Your tackle determines the type of action you will get when fishing. Light tackle will work well on pan fish or small bass, but if you plan to go after the big ones I feel that the tackle should match the fish.

Do some practice casting. Good casting places and presents your bait where it does the most good.

FREEZONE IS FOR CORNS THAT HURT.

Why fool around with painful corns, when Freezone can help you remove them. Try it. You'll see. In just days, the corn will be gone... the hurt will be gone. Painlessly. No dangerous cutting. No ugly pads or plasters. Drop on Freezone - take off corns.
