Supporting Our Scholars of Tomorrow...Today.

If we are to have scientists, engineers and other professionals for tomorrow, we must start today.

Our nation's future depends on its greatest natural resource, our young people. And their key to the future is education.

But many students simply can't afford to attend college. Government cutbacks in education support, fewer student loans and rising costs have combined to limit access to a college education for many minority students who need financial assistance.

That's why Brown & Williamson Tobacco Corporation continues to support

educational opportunities with contributions to the United Negro College Fund and directly supports institutions of higher learning that serve minority students. Our commitment to UNCF is only part of Brown & Williamson's, and our employees' grants to education.

We know these future leaders, now studying in colleges and universities across the country, need our help. Given the opportunity, these young people will excel and secure a brighter future for themselves and for all of us.
