

Even Great Athletes Have Small Beginnings.

**For every child between birth and first grade,
today is a very important day.**

It is one of only a handful of days when "forever" is formed.

Birth to age five are the most critical years of a child's life. During this time, the brain completes its development, personality is formed, and skills are developed to get along with other people. *In no other period of life do such profound changes take place!*

Life's race starts here.
Please join us in embracing the responsibility of giving *all* our small children the things they need to have a positive and meaningful beginning in life!
