

Quality Education Academy

TESTIMONIALS

"I was not satisfied with the content and level of education my daughter was getting in traditional public school. I had heard and seen wonderful events taking place at QEA and enrolled my daughter, Tamera in Pre-K. She was reading fluently at four and recited her first poem by Maya Angelou, 'Phenomenal Woman' as a Pre-K student! Not only did my child graduate from QEA at 16, but she was accepted into a private college that year! She now attends Livingstone College, as a happy and well-rounded freshman. QEA is the best kept secret!"

Tammy Melton

"We sent our child to a different school every year, until my wife heard about QEA from a family friend. Our child has been at QEA for 8 years and we don't regret sending him one bit! QEA has done wonders for our child. QEA offers so many programs to my child for free, including tutoring. They just don't have to care as much as they do!"

Mr & Mrs. David Stevenson Sr.

"I like that my child, Cheyenne, can get the one-on-one attention she needs and is not being pushed aside. QEA has helped my child develop the necessary social skills to interact with others. She is getting the education she needs and deserves at Quality Education Academy!"

Camille Payne

Quality Education Academy has allowed my child, Chrisean, to tap into his love of math and science. He receives individual attention and I also love the fact that he is able to participate academically in peer-tutoring. This has helped build my child and other children's confidence and character. My child also has the opportunity to work on higher grade level work that continues to challenge him academically."

Leslie Hardy

"Quality Education Academy is a great place for learning. As a parent of 2 students, 1 in kindergarten and 1 in Pre-K, I am thoroughly pleased with the QEA experience. I only have positive feedback from my experience at QEA. They truly raise the quality of life of everyone they touch!"

Jessica Bryant

"My daughter has attended Quality Education Academy (QEA) since Kindergarten in 2006. Finding a great school was very important to me. When we took a tour of the school, we fell in love with it! The school was very organized and the students behaved in a disciplined manner. We felt that this school was perfect for our child because 1) they incorporated interactive learning, 2) they provided a safe and secure environment, and 3) they teach the children responsibility. We decided that a 20 minute drive from our house to the school was a small sacrifice to make when compared to the long-term benefits of a 'Quality' education. During my daughter's 2nd grade year, her teacher noticed that she was working on an advanced level and suggested possibly having her take classes in the 3rd grade. The 2nd grade teacher coordinated with the 3rd grade teacher, and my daughter was allowed to take math and spelling classes on the 3rd grade level. She ended up with an A average in both classes! This is an example of how Quality Education Academy will cater to your child's needs. I thank GOD for giving Mr. Simon Johnson the idea/vision to begin such a wonderful school. I am proud to see the school grow so much during the last six years. I say 'Try QEA!'"

Teaune Vinson

"I LOVE QEA because I feel like it is biblically-based, teaches morals, builds character, self-esteem and virtue. Over the last 8 years, QEA has taught my son, Alphonse, integrity and shown him he can be more. At QEA he is a person and not just a number. He has gotten a better sense of who he is. He loves it and has a great relationship with all his teachers. I want my grandchildren to go to QEA—everyone with children should! QEA shows that we can compete and do as well or better than others. The CEO and administration are really for our children. We need to understand that we have something great in QEA! The name is true: Quality is just what the school is."
