mind are just as competitive as those of the body.

"I had daughters who played soccer and there's that competitive spirit when you play a sport, and these kids have that same competitive spirit when they are playing science," she said. "They get the same medals and trophies as they do for sports activities." The first Science Olympiad was held in 1974 at St. Andrews Presbyterian College in Laurinburg, where students from 15 North and South Carolina schools competed. Other states started to follow suit and eventually Science Olympiad became a national competition in 1984. As the host site, Atkins was extended a unique opportunity. Browne said most Science Olympiad competitions are hosted at colleges. Atkins, a school with a science, technology, engineering and mathemat-

regional The Science Olympiad tournament attracted more than 200 middle and high school students from local schools and throughout the Piedmont Triad.

While some components of the competition required students to merely answer written questions, other events were more hands-on. Judges gauged how well students launched bottle rockets, flung gliders and built contraptions.
