THE MOST IMPRESSIVE PART OF THIS CAR IS THE ONE LUXURY FEATURE IT DOESN'T HAVE.

While many of today's prestigious European sedans offer favorable performance and handling, they also feature something far more substantial. Astronomical sticker prices. But the Volvo 760 GLE is a notable exception. Inside you'll find room for five adults. An advanced climate control system that completely changes the interior air every twelve seconds. And orthopedically designed front seats to help keep your mind off your back. And on the road. And to help keep the car on the road, a unique rear suspension system flattens out the bumps. And provides more predictable handling in wet or slippery conditions. It all adds up to the finest, most comfortable Volvo ever built. So before you purchase a prestigious European sedan with an outrageous European price tag, come in and test drive a gas engine or Turbo Diesel* Volvo 760 GLE. Only then will you truly appreciate the difference between a lot of money spent. And money well-spent.

WHIPLASH!

If you or someone you know has been in an auto accident within the past two years they need to have their spine checked by a spinal specialist. If arm, neck, shoulder, or head pain seem to be more persistent and present more often, then you may have problems which if caught early enough can be helped by Chiropractic Corrective measures. The initial consultation and exam is FREE. In almost all cases insurance will pay 100 percent when an auto accident is involved. CALL NOW before some degree of permanency occurs.
