F.I.C.A. stands for Federal Insurance Contributions Act, better known by the Social Security Tax withheld from paychecks. This particular tax on money earned has increased in 1984 and now requires coverage for a larger segment of the work force not included before : **CHURCH EMPLOYEES**

Prior to 1984, churches were not required to participate in Social Security coverage for employees, except on a voluntary basis. The new tax regulation has changed this option.

Churches are now required to pay a designated percentage of their employees' Social Security taxes, and withhold corresponding percentages from employees' wages. But what about those of you who have worked for a number of years as a church employee, but had no Social Security taxes paid?

For example, a church employee, age 58, expects to retire in seven years and has not been covered by Social Security until 1984. Will the seven years of Social Security contributions accumulate enough retirement dollars for a realistic income during your retirement years - what other plans have you made?
