

**This is more than just  
an ad for your heart.  
It's a blessing in disguise.**

Did you know that if you are African American, 45 or older, you are at a higher risk

of heart attack and stroke? St. Joseph aspirin, that little orange pill you remember, can significantly reduce your risk of heart attack

and stroke when taken daily. And St. Joseph only comes in 81mg, the dosage doctors

recommend most for daily heart therapy. Is it a sign? Just think of it as a message from someone who's looking out for you.

**St. Joseph. Protecting You. Heart and Soul.**

81mg aspirin therapy is not appropriate for everyone. Talk to your doctor before beginning or revising your aspirin therapy.
