430 Persons Visit Exhibit On "Summary of Atomic Energy"

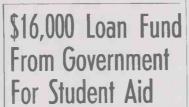

Residents of the Roanoke-Chowan area had an opportunity to see one of the latest circulating package exhibits of the United States Atomic Energy Commission The exhibit, entitled "Summary of Atomic Energy", was presented through the courtesy of Chauser College. the courtesy of Chowan College on September 29, 30, and Octo-

ber 1, in the Student Union Building on the Chowan campus. The "Summary of Atomic Energy" is an exhibit of 18 panels which simply illustrates, both graphically and in words, the story of atomic energy. Recently designed especially for the general public, the exhibit contained information about atomic structure, fission, radioisotopes, and some of the peaceful applications of atomic energy in the fields of industry, power production, agriculture, and medicine. One panel illustrates the use of an atomic of 1958. reactor in producing electrical power. Another shows how radioisotopes are used in medicine to diagnose and treat diseases. Still another explains how industry is benefiting from atomic

"Summary of Atomic Energy" was open to the public from 8:30-11:00 a. m., 1:30-4:00 p. m., and 7:30-9:00 p. m. all three

The showing was the first time the exhibit had been offered in eastern North Carolina and there was no admission charge. Visitors saw not only the Atomic Energy exhibit, but also Chowan's modern science building, the recently-completed college cafeteria, and the new girls' dormitory where refreshments were served.

A report from the department the repayment period begins. of science at Chowan stated that approximately 430 persons own student loan fund of several turned out to visit the exhibit. viduals. Lecturing to the visiphysics class

Chowan College has received a grant of \$16,100.00 from the federal government to be used for student loans during the 1959-60 academic year.

The funds are part of a \$47 million allocation being made available this year to colleges throughout the nation, as part of the eight-year mergency education measure passed last year, known as the National Defense Education Act

Under terms of the grant to Chowan, the college will administer the loans in the same manner that it handles its own loan funds. Grades, character, and other qualifications will be considered in the approval of requests for loans. However, under the terms of the grant, preference is to be given to students who intend to teach or to study science, mathematics, engineering, or modern languages.

Individual loans cannot ex ceed \$1,000.00 per school year. Repayment of the loans must begin one year after the student is graduated from college, and may be stretched out over a period of ten years. The loans are made at 3 per cent interest, but no interest is charged until
