

Crowded Conditions Experienced In Greene Science Building

(Continued from Page 3)
 oratories is the only answer to this problem. In addition, the laboratories are for three hours, which means that too many laboratory sections eat away the time which could be allotted to the one-hour courses offered in the other departments.

During this Fall, the Department is offering courses in 17 different subjects. There are a total of 45 lecture sections and 29 laboratory sections consisting of three hours each. In all, there are 6,327 student contact hours made each week. This coming Spring, two additional courses must be offered—Chemistry 173 for nurses which consists of three lecture and three laboratory hours a week, and Medical Biology 123 which is a three hour lec-

ture course for medical secretary and pre-optometry students.

Even with the crowded conditions, we believe the students profit immeasurably from their courses in the department. Each course in a science or in mathematics greatly enhances their appreciation of the world around them. The immensity of the universe, the immutable laws which control it, from the infinitesimal to the infinite, cannot help convincing them that the guiding hand of a Supreme Being is surely behind it all. The department is made up of dedicated individuals who are ever alert to learn new concepts and pass them on to their students. Their greatest need is more space in which to have more personal relationship with their students.

STUDYING SPECIMEN—Ronald Tanner views magnified specimens through a microscope.

EXPERIMENTING—Bill DeLucia carefully scrutinizes equipment used in experiment he is conducting in the Physics laboratory.

The Meredith Girl Is Special

She does not sit and mourn for her society; she moves and takes an active part in the world around her. Meredith's small classes, positive Christian values, and high academic standards compel her to do her best and to become her best.

Meredith is a four-year, liberal arts college for women, founded and supported by the Baptists of North Carolina but attended by students of many denominations. On a 225-acre campus in Raleigh, the State Capital, it is near three outstanding universities. Inquiries are welcomed from prospective junior college graduates, their parents, and friends.

MAJORS: Art, Biology, Business, Chemistry, Church Music, Economics, English, French, History, Home Economics, Latin, Mathematics, Organ, Piano, Public School Music, Religion, Sociology, Spanish, Violin, Voice

DEGREES: Bachelor of Arts
 Bachelor of Music (requiring a fifth year of study in applied music)

Fully Accredited
