GARDEN PROGRAM PUT ON BY KIWANIS CLUB. A Lee County Farm Home Garden program was put on by the Kiwanis Club at its meeting at the Carolina Hotel last Friday evening, in charge of Kiwanian J. M. Clark, chairman of the Agricultural Committee.

The music for the occasion was made by the club with Herbert Russell, Jr., at the piano. The friends of this bright talented boy expect to see him make his mark in music. There was a good attendance, 28 of the 31 members being present. Kiwanian J. R. Rives, whose name was drawn, gave a sketch of his life under the head of "Who's Who?"

Kiwanians J. M. Clark, J. R. Rives, T. A. Wicker and Chas. P. Rogers made talks on gardening and agricultural subjects and W. F. Wood told of the prospects of a big tobacco crop in this section this year.

The following information about the county garden program was furnished Mr. Clark by Miss Simpson, Lee County's very efficient Home Demonstration Agent.

January—A food and Nutrition survey was made in 16 communities and 193 homes to find out what foods were produced at home to feed the families a well balanced diet. The reason behind this is the increase of pellagra in all sections. The results showed fair variety in some seasons of the year and narrow diet in others. Adequate diet was taught all women's clubs.

February—Held a Garden School for leaders from the 16 communities. College sent a specialist to give instructions in planning the year-round garden early and methods of cultivation as well as varieties best suited to this state and certain ones best suited to farming. 50 women attended the school.

March—The time devoted to home gardens at each club meeting this month dealt with natural and artificial fertilization of the various garden crops. The record card for garden members was explained and the spring season card for 1930 was distributed.

April—Devoted a part of each meeting in the 16 groups to garden study. Garden notes furnished by State College were read to the women and copies left with leaders. The information sent out in March from the college was best varieties of beans, sweet corn, cucumbers, okra, melons, peppers, sweet potatoes, and tomatoes for the Piedmont section of the State.

May—A lesson in control of the commonest garden insects of this section was given in each of the club meetings in May. Sprays, dusts and methods of applying them were discussed. It was found that many people were applying the wrong treatment with the result that their efforts were wasted.

June—Timely advice on strawberry beds, sweet potato cuttings, late tomato crops, cabbage and collard plants, continuous crops of corn and beans, and melon patch control was given in June. Canning has a new impetus. Insect for dry weather and some insect trouble the whole garden outlook is good. Greater variety is planted than usual. Better quality seeds are now yielding fine beans and other crops.
