## Do Your Worries Increase When the Mercury Goes For Endurance Record of 95° or Hotter?

Do you wonder each evening if left over foods will be spoiled the next morning? Do you deprive yourself and family of tasty perishable foods because you are afraid to trust them to your present means of refrigeration? Can your baby's milk be kept free from bacterial growth? In short, are you paying for refrigeration you don't get by using equipment that cannot give more than fair results even in moderately warm weather? If so, then why not install a refrigerator that will provide a constant temperature of 50 degrees whether the outside temperature is 10 or 110

## The General Electric WILL SOLVE YOUR Refrigeration Problem.

In addition to the fact that foods may be kept perfectly, you rid yourself permanently of refrigeration worries, regardless of the weather. Once you experience the benefits of trouble-free electric refrigeration, you'll wonder how you ever kept house without it. A model may be had for your home at a most reasonable price and on easy terms. Cost of refrigeration will be less than your present refrigeration bill.

## More than a Million and a Half see it the very first day

### THE EIGHT AS **BUICK** BUILDS IT

Over 1,500,000 people visited Buick showrooms on Saturday, July 26, to see The Eight as Buick Builds It... the greatest reception ever accorded an eight-cylinder car.

Bona fide orders for these new Buick Eights totaled 7000 before the car was presented—a greater volume of business than any single month's sales of any other Eight\* ever built.

And within the first five days, this record volume of orders had doubled.

There are four series, in four price ranges, including one series priced fully \$200 lower than last year's Buick Six. It is the world's lowest priced Valve-in-Head Straight Eight!
