## CHEVROLET PAYROLLS ON STEADY INCREASE

Detroit, Mich., Feb. 22.—A new all-time high in employment was achieved by the Chevrolet Motor Company for the week ending Feb. 10 when direct company payroll totaled 56,545 people, M. E. Coyle, general manager, announced here today.

The high mark prior to this year was 52,847 men and women employed in June, 1929, while last year at this time factory payroll numbered only 32,079 people, Mr. Coyle stated.

The present record force set a new high daily output figure for the present year's program when they completed the assembly of 3,770 new 1934 cars and trucks on Friday, Feb. 16, Mr. Coyle stated. Through the first fifteen days of the month the company completed the assembly of 33,545 new units which have already

been shipped to dealers. This is within 12,000 units of production for the full month of February last year, Mr. Coyle stated.

Plants are now headed toward capacity, with dealers making delivery of new 1934 models to consumers, and the rate at which orders are being received indicates capacity operations for some months to come, the Chevrolet head declared.

Detroit shows the largest gain on the company's employment map. The payroll here includes the central office staff, and the workers at the Chevrolet plant centering at St. Aubin and Holbrook avenues, where the new "knee-action" wheel sets are being built. Detroit payrolls as of Feb. 10 stood at 16,809 people as compared with a previous all-time high here of 12,720 in June, 1929, and less than 8,000 one year ago. Much of the increase is due to the large number of men engaged solely in the

building of the "knee-action" devices, which are coming off their own assembly line with increasing frequency from day to day.

"This one invention," said Mr. Coyle, "has added several thousand men to our payroll—men who could not have been given work had we not incorporated the new device in our 1934 cars."

At Flint, where four plants are maintained, payrolls were 15,725 men as compared with 11,000 a year ago. Bay City, where small parts are manufactured, 1,782 were on the payroll as against 1,081 last year.

At Saginaw, where Chevrolet operates the largest grey iron foundry in the world, two daily shifts consisting of 4,660 men are pouring castings for the new models, as against 3,443 in February of 1933.

Toledo, where transmissions are manufactured, had 2,671 men at work within one man of the 1929 high.

These locations comprise mainly the manufacturing operations of the company, and account for 41,500 men on the payroll. The remaining 15,000 employees are at work at assembly operations in cities out of this area, and at the commercial body plant at Indianapolis and the export packing plant at Bloomfield, N. J.

## POULTRYMEN

The outlook for poultry and eggs is the best this year that it has been in many. Lots of people have sold their flocks so chickens are scarce. The U. S. Government bought quite a few million cold storage eggs for relief thus cutting down the surplus eggs in storage. This means higher prices for fresh eggs this fall.

Save your good eggs and let us set your eggs and get a start from chicks that are hatched right. We set eggs every Tuesday.
