Wet Weather? Dry Weather?

We do not know which it will be for the rest of the year but we do know that Nitrate of Soda seems to do better in a dry year and Sulphate Ammonia seems to do better in a wet year.

We have ample stocks of Fertilizers, Sulphate Ammonia and Nitrate of Soda.

This year some are making doubly sure about the weather by mixing half sulphate Ammonia and half Nitrate of Soda for the cotton and corn top dressing. We will be glad to sell you either or both.

We have nitrate of soda and Sulphate of Potash for top dressing Tobacco.

BEAUTY! is only skin deep

THE most perfectly molded features can be spoiled by a dull, faded complexion. When you subject the delicate texture of your skin to the searing heat of old-fashioned cooking methods; when you stand for hours in the stale air of a stuffy kitchen, robbed of much of its oxygen by flaming fuel; when you allow your complexion to be withered by noxious fumes and clogging greases, you are destroying your beauty.

and line your face beyond repair. Famous beauty experts tell us that it is not years, but dry skin that ages a woman. Electric cookery is cool, clean and automatic, so that your hours in the kitchen are few and you have much happy freedom with which to build up your vitality and put the sparkle in your eye, while your meals cook to delicious perfection without attention.

Do not let the drudgery of preparing meals three times a day over an old-fashioned range steal your charm away
