

WASHINGTON DAILY NEWS

Entered as second-class matter August 5, 1909, at the postoffice at Washington, N. C., under the act of March 3, 1879.

PUBLISHED EVERY AFTERNOON EXCEPT SUNDAY. No. 114 East Main Street.

J. L. MAYO, Editor and Proprietor. Telephone No. 290.

SUBSCRIPTION RATES: One Month, \$1.00; Four Months, \$3.50; Six Months, \$5.00; One Year, \$9.00.

Subscribers desiring the paper discontinued will please notify this office on date of expiration, otherwise it will be continued at regular subscription rates until notice to stop is received.

If you do not get The Daily News promptly telephone or write the manager, and the complaint will receive immediate attention; it is our desire to please you.

WASHINGTON, N. C., NOV. 2.

LET THE NEWS FOLLOW.

Parties leaving town should not fail to let The News follow them daily with the news of Washington fresh and crisp. It will prove a valuable companion, reading to you like a letter from home.

MUST BE SIGNED. All articles sent to The News for publication must be signed by the writer, otherwise they will not be published.

THE NEW PHONE EXCHANGE.

Washington citizens and business men now enjoy one of the most complete and up-to-date telephone exchanges to be found anywhere in North Carolina.

The Carolina Telephone and Telegraph Company desires the thanks of the city for installing a system in keeping with the growth and expansion of Washington. It is a system fully abreast with the times and modern in its equipment and construction.

The company has spent in the neighborhood of \$45,000 to complete and install this modern exchange. The work is completed on the 24th inst. and it will be at least thirty days more before the company is satisfied that such a complete system is in operation.

Since the work of installing the new system has been going on, the company has been receiving many inquiries from business men and the public as to the progress of the work.

The company has been very successful in obtaining the necessary funds for the work. The money has been raised through the sale of bonds and through the contributions of the public.

brain. But there are far too many who snatch at any employment and find themselves condemned to it. They sweat and groan and so add to their unhappiness. They butt their heads against stone walls and then wonder at the bruises. Let's preach a bit. If the work is not to one's liking try to make it so. Complaining will do no good; sulking will do no good; putting the blame on the job, and it's dollars to doughnuts that the job will pay you back. It will grow easier and more agreeable in time a genuine liking for it may be developed. And then will come the best of happiness. Cleveland Leader.

NEW TELEPHONE PLANT NOW IN FULL OPERATION

(Continued from First Page)

extend an earnest invitation to all of its patrons and any interested parties to visit its central office and see the system in actual operation. If it were possible to sufficiently interest every telephone user to make this visit and spend a few minutes in the central office, the telephone company will be able to give very much better service after a subscriber once sees the operation of the system and has it explained to him, he will then be in a better position to use his telephone intelligently and will understand if the operators are apparently inattentive.

Mr. Bell, the local manager, will be glad to show any one through the office, and will take pleasure in explaining the operation of the new system. Subscribers are earnestly requested not to restore their receivers to the hook until they have actually completed their conversation and do not desire to converse with the same subscriber any further. It is necessary for a subscriber to leave his telephone in order to obtain some information, leave the receiver on the hook, otherwise the placing of the receiver on the hook gives the operator the disconnection signal and the connection will be taken down. In this way you will lose connection with the subscriber with whom you are actually talking.

The local manager, Mr. Bell, will at once start the installation of a new directory, and any party desiring the installation of a telephone should notify Mr. Bell, a copy of the directory will be sent to the subscriber. Some subscribers may experience delay in obtaining the desired service for a few weeks until the operators have become thoroughly expert in the use of the new system and new switchboard. In a few weeks' time, however, the operators will be expert in the handling of the new switchboard and the service should then be second to none in the State.

The company has been very successful in obtaining the necessary funds for the work. The money has been raised through the sale of bonds and through the contributions of the public.

better-spared during later months and undoubtedly decreasing the returns by the lower prices which enforced marketing at a given period. Yes, the railroads are vitally interested in the improvement of the country highways, for they mean enlarged prosperity to them. It is for this reason that railroad men have studied the highway problem, it is for this reason, even if the men at the head of your railroad systems were not interested in the improvement from the standpoint of good citizens, that they are ready to do what they can to secure for the districts which they serve the advantages of the best possible roads leading out through the villages and farms.

THE RAILROADS AND THE PUBLIC ROADS HIGHWAYS

(Continued from First Page)

The highway is the feeder of the railroad and the river transportation systems. They do two things which mean nothing for the railroads. They build up the tributary territory, they increase the population and the production of the sections which support the railroads; by making the people more prosperous they add to the demands of any given section, and that means not merely a greater movement of freight but a larger variety and to a very considerable extent a higher class of traffic. The kind of traffic that is the most desirable. Good roads will do more than any other thing to develop the territory of the South or of any other portion of the country, and that development will mean more traffic for the railroads. It will mean for your various sections better railroad facilities in the way of improvements on existing mileage and the addition of new mileage. The second thing in which they will help the railroads is by creating a more even movement of traffic throughout the year. As you know the farmers of almost every section of the country are compelled, largely on account of the prevalent impassable roads during the winter months, to rush their crops to market in the fall before the rainy season comes. You people of the clay country of those mountains know what the west season do to your roads. This necessity of moving farm products at one season congests traffic during the period of marketing, creates delays and unusual expenses in the railroads, requires greatly increased investments for rolling stock and warehouse room. It adds to the cost of railroad handling and so decreases the profit to the transportation company. It is also a tax upon the farmer, compelling him to take time from his farm which could be

It was learned on well-founded rumor today that the report last night that on the last ballot the jury stood seven for acquittal and five for conviction was an error; that as a matter of fact every ballot taken has been six for and six against the defendant. The jury men, it is rumored, understood thoroughly the instructions of the court and the tie-up is not a question of further instructions from the court. The jury has spent the day alternately in the jury room, out walking and lounging in the courthouse yard.

Just how long Judge Adams will keep the jury together is not indicated, but it is probable that if the men fail to agree by tomorrow, a mistrial will be ordered. The consensus of opinion here is that the jury will not agree and that the case will have to be brought on over again.

Hicks' CAPUDINE Cures Sick Headache. Also Nervous Headache, Trailing Headache and Aches from Grip, Stomach Troubles or Fevers, troubles. Try Capudine—it's liquid—effects immediately. Sold by druggists.
