COME OUT AND ENJOY BOTH PICTURES AND MUSIC TONIGHT.

**WOMEN'S SHOES**

IT IS WITH A FEELING OF PLEASURE AND PRIDE THAT WE ANNOUNCE THE ARRIVAL OF OUR WOMEN'S FOOTWEAR FOR THE FALL AND WINTER SEASONS.

Our shoes are far superior to the ordinary sort of shoes that can be had at every store, where women's shoes are sold. They came to us direct from the workshops of the world's most noted makers of women's shoes. There's many a new style feature in the fall models, and we will take the greatest pleasure in showing our women patrons the handsome foot-wear that will be in vogue during the coming season.

**STATE NEWS**

Condensed Items of Interest Happening Throughout the State.

The steamer *Toddia* recently passed inspection by the steamboat inspectors and Capt. Colson, the owner and master of the steamer, has established a line between Crosswell, N. C., Elizabeth City and Norfolk. Captain Colson is well known as a steamboat man in these waters and we bespeak for Captain Colson a successful business.—Elizabeth City Tar Heel.

The board of school commissioners wish it thoroughly understood that it heartily stands by Miss Josie Henderson, the teacher who was necessarily involved in the episode leading to the temporary suspension of the two sons of Rev. R. T. Patterson from the city schools some days ago. It was feared by some that the reports of the press in regard to the meeting of the board Tuesday night when the matter was threshed out did not fully portray the fact that it was altogether convinced that Miss Henderson did her duty fully and without equivocation and for that reason this additional word has been solicited.—Charlotte Observer.

While picking cotton several days ago, Mr. J. H. McDaniel found a peach tree on which was a second crop of peaches. Mr. McDaniel stated that the peaches were almost the natural size and that the flavor was as good as that of the first crop peaches.—Concord Tribune.

That farmer who is "again" the work for good roads is standing in his own light. The work for better roads throughout the South is one of the greatest steps in the improvement of the country that has ever been undertaken. The South today and the South of yesterday are two different sections. The farmer's time is getting more valuable to him and the all-day trip to town, four miles away, with several bales of cotton, is getting to be waste of energy. Good roads will cut the trip in half, and on the wagon will be carried twice as many bales of cotton. There is not much room for complaint in that scheme.—Greenville Piedmont.

Rev. W. M. Shaw, who returned on the early morning train yesterday from Clarkston, gives a graphic account of the recent wreck on the Seaboard at Armour, N. C. The rear coach of a special train for Taft Day into which the freight crashed, was occupied by Robeson county and Bladen county Confederate veterans and their escape from serious injury was marvelous. Only the splitting of two cars in front saved them from the terrible force of the impact. As it was, the rear coach was telescoped for several feet and many of the old soldiers were badly bruised up and shaken. Major W. S. Clark in charge of the Bladen veterans, here for the Taft celebration, was perhaps worst hurt and has been confined to his bed since. Sheriff Marvin Clark of Bladen, was also injured rather severely, but not seriously. While no lives were broken, the veterans in the party were badly shaken up and will be nursing bruises for some days in all probability.—Wilmington Star.

F. T. Maloney, of Waynesville, traveling salesman for a Bristol firm, was brought to the Glen Rock hotel yesterday suffering with a broken ankle which was caused by his being thrown from a carriage ten miles from Brevard yesterday morning. The leg was set by Dr. F. T. Meriwether and Mr. Maloney will be able to go to his home in a few days. Mr. Maloney had left Brevard in a carriage driven by a colored man to visit country stores, and was near the railway when the horses taking fright at a train, became uncontrollable and ran away. The driver was bruised, but the passenger hid his leg broken. The incoming train from Lake Toxaway was stopped at Davidson's River and the injured man was brought to Asheville.—Asheville Citizen.

We are informed that a petition was presented to the county commissioners today requesting them to call a good roads convention this month for the purpose of considering a bond issue to macadamize the roads of Craven county. New Bern has taken on new life and is going ahead with her improvements and we are glad to see that this spirit of progress has taken hold of the farmers.—New Bern Sun.

**WEANING THE LAMBS.**

Feed the Ewes Well While Nursing and the Lambs When Weaned.

Lambs should not run with the ewes after November if the ewes are tested to lamb early in the year. And this is very desirable, as it gives the ewes a rest to make up their growth, and puts them through the winter in good condition and brings the next season again a little earlier. When the lambs are separated from the ewes it will be necessary to give them a little grain, which is best in the form of finely ground meal. This is wholly used by the lambs, and none of it is lost for want of full digestion. There is no more satisfactory way to push the lambs forward for the next year than to put the ewes on good feed and so supply the lambs with plenty of milk of the best quality. To feed the ewes well, when nursing the lambs, adds fully a month to their growth, and thus puts them forward for a repetition of the same advance for the year following. What is thus gained is worth twice as much as any gain afterward. No one who has not tried this constant pushing on of the lambs will be disappointed with the results. It easily adds \$1 to the value of each lamb, and this is of itself a very considerable bonus on the year's income from a flock. Some farmers especially dislike early lambs for the reason that they begin to eat too soon, making it necessary to feed before the early spring grass is ready. But one ounce of meal or bran is worth more than a full pound of grass, and the constant practice of all sheep keepers should be to push ahead all the lambs and keep this larger growth increasing naturally as the animal grows older. The last pound of increase in any animal will cost more than twice as much as the first, and this rule will apply to all kinds and conditions of animals, but most of all to lambs, and sheep after them. Feeding is an art that must be learned by practice; it may be studied very profitably by reading the experience of others, and so one will know what to do and what to avoid in his own practice.

**FOR DIVIDING HOGS.**

Double Pen Which Will Prove of Great Help in Task.

Have two pens, A and B, with an opening, just wide enough to allow one hog to pass through at a time, to the corner of A, as shown in the accompanying illustration. Have a gate on hinges at post C to swing from post D and E. Attach pulleys at D and E with ropes fastened to the remaining pulley and back to F. Throw some corn in the pen A, call the hogs, and standing at F, where the hogs can be seen, operate the gate as the hogs pass out. Some shelled corn, says Prairie Farmer, should be thrown in pen B to keep the hogs from coming back into pen A.

**A Handy Hog Chute.**

The illustration explains itself and is a light handy chute to use in loading hogs. It should be made of strong material, say 2x4, for sills for bottom and for upright pieces to fit in the staples on sides of bottom. Also two small hooks are placed at the bottom to hook on wagon box. Cleats should be nailed on the bottom so hogs can walk up easily without slipping. About six feet long makes the right slant and three feet wide.—H. E. Studebaker.

**Trush in Horses' Feet.**

Little is known about the origin of the term "trush," as applied to a diseased condition of the "frog" or hoof triangular center visible on the ground surface of the horse's foot, but the cause or causes giving rise to the diseases are well known, and, therefore, should be understood.

Filth is the chief factor in the development of trush. Some owners believe trush to be contagious, but there is no contagion about it at all, for remove the filth, clean the feet, and often the disease will cure itself. Canker of the foot is a contagious disease, however, and is due to a parasite of vegetable origin. Mares suffer from trush oftener in the hind feet than do stallions or geldings who suffer in the fore feet principally. The reason for this is obvious.

**ANOTHER OPEN LETTER.**

Greenville, N. C., November 11, 1909.

To O. L. Joyner:

Sir—Something like 14 days ago I wrote you an open letter, challenging you to meet me in the courthouse at Greenville, on a public issue you are conducting with the people of North Carolina, setting forth a bill of indictment very clearly which I am ready to defend at any time. Not having heard anything from you, I will state that unless you set a date soon, then I will, as I am determined to be heard, and am standing pat on the proposition.

Yours, &c.,
