**CONDITION IMPROVED.**  
The condition of Miss Marcia Rodman, whose illness for several weeks has grieved her friends, is somewhat more favorable today.

**Valuable By-Product.**  
Manure is one of the by-products of the dairy which should be figured in, in estimating the profits. As farming land becomes more scarce and high-priced, farmers in general are coming to realize the importance of making their land as fertile and productive as possible. The large, final profit of the dairy to the man who owns his own land is the manure by which he is not only able to grow larger crops, but to increase the fertility and actual money value of his farm.

**Transmitting Milk Qualities.**  
The influence of the male in transmitting milk qualities to his offspring is a point in which dairymen give too little heed. Who is there but has not been disappointed in his heifers from the best cows by the use of some unworthy bull, or, if he has been so fortunate as to secure a bull of some extra milking strain, has not found his heifers from cows good or bad exceeding their dams in yield and quality of milk? Look well to the bull, for in his choice lies success or failure.

**Coloring Butter.**  
There is no moral wrong in coloring winter butter judiciously. Almost anyone would prefer to eat butter that pleases the eye as well as the palate. A strain of Jersey or Guernsey blood in your cows will help you out on the coloring.

**Provide Green Food.**  
Be ready for the dry spell when it comes in summer and have green food for your cows by planting a special patch for them now.

**Guessing—Un satisfactory.**  
The only way to accurately judge a cow is by weighing and testing her milk. Guess methods will prove most unsatisfactory.

Cleanliness is the best law of health, inside as well as outside. Let Hollister's Rocky Mountain Tea be your internal cleanser, then your organs will be pure and clean, your health good, your system right. Start tonight. Hardy's Drug Store.
