**FARMER'S WIFE HAD HEAP TO DO**

**Mrs. Shepherd Was In Bad Shape When She Could Not Stand on Her Feet.**

Durham, N. C.—"I am a farmer's wife," writes Mrs. J. M. Shepherd, of this city, "and have a heap to do."

"Four months ago I could not stand on my feet to do anything much, but at this time I do the most of my work. I took Cardui and it did me more good than all the doctors."

"You don't know how I thank you for the Cardui Home Treatment. I wish that all women who suffer from womanly trouble would treat themselves as I have. Ladies can easily treat themselves at home with Cardui, the woman's tonic. It is easy to take, and so gentle in its action, that it cannot do anything but good."

Being composed exclusively of vegetable ingredients, Cardui cannot lay up trouble to your system, as mineral drugs often do. Its ingredients having no harsh, medicinal effects, and being non-poisonous and perfectly harmless, Cardui is absolutely safe for young and old.

Ask your druggist. He will tell you to try Cardui.

**Will Promote Beauty.**  
Women desiring beauty get wonderful help from Bucklen's Arnica Salve. It banishes pimples, skin eruptions, sores and boils. It makes the skin soft and velvety. It cures itchy face, chapped lips, chapped hands, heat, redness, scalds, fever sores, cuts, bruises and piles. 25c at all Druggists.

**Dairy Doings.**

Sanitation in feed is no more conclusive to appetite in the cow than in the human, and appetite is essential to life production.

Treat your calves with consideration. They should have grazing, plenty of water and enough skim milk and grain to form a balanced ration.

Kicking is very frequently caused by sore teats, inflamed udders, loose flanges and possibly at times by the general awkwardness of the milker.

The dairy barnyard should have good slope, such as will insure good surface drainage, and should have a good top layer of gravel or cinders.

When buying cows for the dairy select those having every indication of being milk producers, but determine this positively by the use of the Babcock test and the scale.

It is not the way the cream is separated from milk, but the way it is handled after being separated, which determines the quality of butter it will make. If kept until it ferments it will make poor butter.

**Singular Union.**  
The man who was wedded to an opinion found himself married to a one-eyed deer (one ideal).

**TIME**

Time is a mocker. To two persons differently situated time has either the wings of an eagle or the feet of a snail. To a man in expectancy a day appears a week and a month a year. To one in possession the sun seems no sooner risen than it is set and summer has scarcely melted before autumn seems ready to descend.

**Wesson SNOWDRIFT OIL**

Is better than the richest Jersey butter for frying; the equal of olive oil for salads and dressings, and as a shortening surpasses anything known for that purpose.

It is refined to a degree of absolute purity by a process only known to and used in Wesson Snowdrift Oil. It is purely vegetable, odorless, tasteless, and unapproached for healthfulness.

It is used by the leading caterers throughout the country, and is sold by the best dealers everywhere. Call for Wesson Snowdrift Oil, and beware of all suggested substitutes. Nothing else can possibly equal its results.

Not Sorry For Blunder  
"If my friends hadn't blundered in thinking I was a doomed victim of consumption, I might not be alive now," writes D. T. Sanders, of Harrodsburg, Ky., "but for years they say every attempt to cure a lung-racking cough fail. At last I tried Dr. King's New Discovery. The effect was wonderful. It soon stopped the cough and I am now in better health than I have had for years. This wonderful life-saver is an unrivaled remedy for coughs, colds, laryngitis, asthma, croup, hemorrhages, whooping cough or weak lungs, 50c, \$1.00. Trial bottle free. Guaranteed by all Druggists."

**GOOD FOR HOLDING COWS.**

Practicable To Hold of Ring Which Holds an Upright Post.

Many systems have been tried for holding cows to secure sanitary milk. The rigid and swinging stanchions, stalls and the other shed systems have been resorted to and are still being used. The method of fastening dairy cows which have secured the demands of the dairy and pure food laws is the stall. Stalls are of many different types, but to be sanitary they must be constructed so that the cow will be comfortable and at the same time not be forced to lie down in her own milk.

The cow's health should be considered when choosing a method of fastening.

COV CHAIN TIE  
(From the Iowa Homestead.)

It is undesirable to place cows in rigid stanchions since they do not have the freedom of their heads obtainable in a stall. Compelling a cow to lie in a cramped position is not conducive to a desirable gentle disposition. A stall which most nearly approaches perfection is one in which the cow is permitted to have the same freedom she has when lying in the field or paddock. This height of perfection is difficult to obtain.

The simple chain tie shown in the illustration, which has long been used, is more humane than the rigid stanchion. The chain here shown is attached to a ring which slides on the upright post and is fastened around the cow's neck with a toggle link.—Iowa Homestead.
