Two Real Home Comfort Makers

The Ruud Automatic Gas Water Heater and the Modern Gas Range

Just imagine unlimited hot water obtained as freely and with the same lack of attention and forethought as your present cold water supply, and you have some idea of Ruud hot water comfort.

At the turn of a faucet, the Ruud in the basement responds instantly, any time—all the time—a cupful or a bathtubful, heating only the actual amount of water drawn. The moment the faucet is closed the gas is automatically shut off in the heater and your expense for fuel ceases.

The Gas Range, like the Ruud, uses fuel only while it is serving you.

The time, labor and money saved is big interest on your investment.

You have, further, better cooking, a clean sanitary kitchen and a dozen other ideal conditions.

The best way to appreciate the merits of these two comfort makers is to see them in actual operation at our show-room.

A postal will bring you complete descriptive literature, or a representative to tell you personally the whole story.
